

2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

Maine 2022 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,180,236	51.00	24.37	59
Community Utilization per 1,000 population	7,900,059	48.92	23.53	59
State Hospital Utilization per 1,000 population	108,725	0.20	0.33	53
Other Psychiatric Inpatient Utilization per 1,000 population	433,997	3.01	1.53	42

Adult Employment Status	U.S.	State	U.S. Rate	States
Employed (Percent in Labor Force)*	890,626	66.0%	51.2%	58
Employed (percent with Employment Data)**	890,626	20.0%	27.2%	58

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:**Table 2a**

Age None

Gender None

Race None

Overall Table data is derived from the Maine Medicaid DDS for SFY2022. Individuals received services during SFY2022 with a mental health diagnosis of F01-09, F20-69, F90-99.

Table 2b

Age None

Gender None

Race None

Overall Table data is derived from the Maine Medicaid DDS for SFY2022. Individuals received services during SFY2022 with a mental health diagnosis of F01-09, F20-69, F90-99.

Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Forensics included in "non forensic" data? No

Note:

U.S. totals are based on states reporting.

This table uses data from URS Tables 20a and 20b.

State Notes:

Data is from Maine's 2 state psychiatric hospitals: DDPC and RPC. 7 clients discharged from forensic unit and readmitted to non-forensic unit.

General Notes FY 2022

Maine

URS Table Number	General Notes
2A	Similar to previous years' submissions, counts are largely based on data from Maine's MaineCare DSS, which contains data on Medicaid recipients. Crisis services data required for new tables this year, presented a small population of 2,951 non-Medicaid recipients who are also reflected in this table's counts.
2B	Similar to previous years' submissions, counts are largely based on data from Maine's MaineCare DSS, which contains data on Medicaid recipients. Crisis services data required for new tables this year, presented a small population of 2,951 non-Medicaid recipients who are also reflected in this table's counts.
3	There was a 31% decrease in Other Psychiatric Inpatient figures from 2021 to 2022. The Office of Children and Family Services observed workforce challenges that prevented psychiatric hospitals from maximizing capacity by filling vacant beds. Additionally, the acuity of youth requiring inpatient hospitalization increased with many requiring 1:1 care while in the hospital setting, further decreasing the overall number of youth able to be served by limited staff.
4	The observed decrease from 2021 to 2022 reflects a change in how data was pulled. Instructions for this table were re-reviewed and data for this table were pulled differently this year than in the past in order to be more aligned with the table's instructions.
4	There was a 21% decrease in Employment figures from 2021 to 2022. Instructions for this table were re-reviewed and data for this table were pulled differently this year than in the past in order to be more aligned with the table's instructions.
4A	There was a 21% decrease in Employment figures from 2021 to 2022. Instructions for this table were re-reviewed and data for this table were pulled differently this year than in the past in order to be more aligned with the table's instructions.
6	Table 6: Decreased number of admissions for both residential treatment centers and community programs reflects workforce challenges following COVID-19. Due to workforce, Residential Treatment providers cannot staff the number of beds they have available; additionally, the high acuity of the youth that are being referred limit the number of admissions a facility can accept. These youth need extra staffing and Residential Treatment providers do not have it. Many providers will not accept a youth if they need a 1:1, and many do. Observed increase in LOS (when looking at median LOS) likely reflect workforce shortages and challenges also, as reduced staff lends to a slower progress with treatment plans and increased LOS.

URS Table Number	General Notes
6	<p>Total Number Served in State Hospital at Beginning of Year: The observed increase from 2021 to 2022 reflects an increase in available beds and capacity. In 2021 the state hospitals reduced the number of available beds, and were not at capacity. In 2022 the number of beds increased, and along with this, the capacity and number of consumers served in State Hospitals increased.</p> <p>Total Number Served in Community Programs at Beginning of Year: The observed decrease from 2021 to 2022 largely reflects workforce challenges following COVID-19 - Maine observed a reduction in the number of beds and service providers following the closure of several providers in response to workforce shortages. Maine anticipates these closures will have a lasting impact on the number of consumers served, waitlists, etc. In response, Maine has conducted a rate study and increased rates for services effective 1/1/2023. Maine has also been working to improve training and certification processes so they are more transparent and accessible.</p> <p>Total Admissions to Community Program During Year: The observed decrease from 2021 to 2022 largely reflects workforce challenges following COVID-19 - Due to workforce shortages, providers were unable to staff the number of beds they had available. This coupled with the high acuity of consumers being referred limited the number of admissions facilities were able to accept.</p> <p>Total Admissions to Other Psychiatric Inpatient During the Year: The observed decrease from 2021 to 2022 largely reflects workforce challenges - Maine observed a significant reduction in the number of beds and service providers following the closure of several providers in response to workforce shortages.</p> <p>Total Admissions to Residential Treatment Centers During the Year: The observed decrease from 2021 to 2022 largely reflects workforce challenges following COVID-19 - Due to workforce shortages, providers were unable to staff the number of beds they had available. Decreased number of admissions for both residential treatment centers and community programs reflects workforce challenges following COVID-19.</p> <p>Average LOS of Adults Discharged from State Hospitals: The observed decrease from 2021 to 2022 reflects COVID-19 related workforce challenges in the overall behavioral health system - an increased number of individuals seeking care following discharge may have struggled to access lower-levels of care prompting a return to the hospital.</p>
7	<p>Total Medicaid Expenditures: The observed increase from 2021 to 2022 largely reflects changes in how the State of Maine categorized funds as Medicaid (Federal, State, and Local) vs Other Federal Funds vs State Funds. The total amount for these categories was 76 million in 2022, up slightly from 74 million in 2021. The increase for this table also partially reflects the inclusion of CBHS that had not been included previously.</p> <p>Total Other Funds Expenditures: The observed decrease from 2021 to 2022 largely reflects changes in how the State of Maine categorized funds as Medicaid (Federal, State, and Local) vs Other Federal Funds vs State Funds. The total amount for these categories was 76 million in 2022, up slightly from 74 million in 2021.</p> <p>Total State Funds Expenditures: The observed increase from 2021 to 2022 largely reflects changes in how the State of Maine categorized funds as Medicaid (Federal, State, and Local) vs Other Federal Funds vs State Funds. The total amount for these categories was 76 million in 2022, up slightly from 74 million in 2021. The increase for this table also partially reflects the inclusion of CBHS that had not been included previously.</p> <p>Total EBP for ESMI Expenditures: The observed increase from 2021 to 2022 reflects increased availability of funding for EBPs and a federal mandate requiring increased use of EBPs. In response, Maine was able to actively invest in initiatives to implement EBPs, resulting in an increase in the number of consumers receiving EBPs.</p> <p>Total Ambulatory/Community Non-24-Hour Care Expenditure: The observed increase from 2021 to 2022 reflects the inclusion of Children's Behavioral Health Services that had not been included previously.</p>
7a	The observed increase from 2021 to 2022 reflects increased availability of funding for EBPs and a federal mandate requiring increased use of EBPs. In response, Maine was able to actively invest in initiatives to implement EBPs, resulting in an increase in the number of consumers receiving EBPs.
8	The observed decrease from 2021 to 2022 reflects increased spending on direct services vs non-direct services.
9, 11, 11a	Overall response rate and number of responses for both Adults and Children increased this year following a change in vendor.

URS Table Number	General Notes
12	The observed decrease in the number of youth with co-occurring mental health and substance use issues from 2021 to 2022 reflects factors related to the sample which is based on Medicaid claims, an increase in SUD issues, and billing code decisions. In brief, it appears that claims for youth with co-occurring issues are being filed as either MH or SUD, not as co-occurring.
12	Figures were calculated by reporting the number of individuals who received services during SFY 2022 with a mental health diagnosis of F01-09, F20-69, F90-99 and substance use diagnosis of F10-19.
14a	The observed decrease from 2021 to 2022 reflects Maine's demographics (primarily White), the low number of Native Hawaiian/Other Pacific Islanders served in the state, and the impact low reported numbers have on calculating rates of change.
15	The observed 27% increase in reported Homeless Living Situations from 2021 to 2022 reflects a combination of the sample and Maine's housing market. Maine's housing costs are up and inventory is down for both rental and ownership. This has resulted in a significant increase in the number of people who are unhoused across the state. The sample is based on Medicaid claims, and the Office of Children and Family Services has provided a path for youth who are unhoused to receive Medicaid and medically necessary mental health treatment. In turn, the reported figures reflect both an increase in youth experiencing homelessness as well as increased utilization of mental health services among youth who are unhoused. It would be inaccurate to interpret the numbers to mean that there has been a 27% increase in the number of youth who are unhoused.
15	The observed increase from 2021 to 2022 reflects a combination of the sample and Maine's housing market. Maine's housing costs are up and inventory is down for both rental and ownership. This has resulted in a significant increase in the number of people who are unhoused across the state. The sample is based on Medicaid claims, and the Office of Children and Family Services has provided a path for youth who are unhoused to receive Medicaid and medically necessary mental health treatment. In turn, the reported figures reflect both an increase in youth experiencing homelessness as well as increased utilization of mental health services among youth who are unhoused. It would be inaccurate to interpret the numbers to mean that there has been a 27% increase in the number of youth who are unhoused.
16	The observed 57% decrease in FFT provided from 2021 to 2022 reflects workforce challenges. Specifically, the Office of Children and Family Services lost a large provider of FFT services in an urban area of Maine, which resulted in a significant decrease in the number of families receiving FFT.
16	<p>Total Number of Consumers Receiving Supported Employment Services: The observed increase from 2021 to 2022 reflects more people going back to work as the impact of COVID subsided.</p> <p>Total Number of Consumers Receiving Therapeutic Foster Care Services: The observed decrease from 2021 to 2022 largely reflects workforce challenges following COVID-19</p> <p>Total Number of Consumers Receiving Family Functional Therapy Services: The observed decrease from 2021 to 2022 reflects the Office of Children and Family Services losing a large number of providers of FFT services in an urban area of Maine, which resulted in a significant decrease in the number of families receiving FFT services.</p>
16B	For "Call Centers" the State of Maine is reporting data from calls to its crisis hotline. For "24/7 Mobile Crisis Team" the State of Maine is reporting data from its Mobile Crisis response Teams who interface with clients in the community after calling the crisis hotline. For "Crisis Stabilization Programs" the State of Maine is reporting data from residential crisis stabilization units utilized by Medicaid clients only. While data for the 24/7 Mobile Crisis Team and Crisis Stabilization Programs was de-duplicated, data for Call Centers was unable to be de-duplicated by the vendor collecting and managing this data.
16B	Data for Adult and Child Crisis Stabilization includes Medicaid claims only, private insurance and general funded services are not included.
19a	Overall response rate and number of responses for both Adults and Children increased this year following a change in vendor.
20A	Observed increases in re-admission of non-forensic patients at 30- and 180-days was likely impacted by COVID-19 generally and by workforce challenges in the overall behavioral health system - an increased number of individuals seeking care following discharge may have struggled to access lower-levels of care prompting a return to the hospital.

URS Table Number	General Notes
20A	<p>Total Percent Readmitted within 30 Days. Non-Forensic State Psych Hospital: The observed increase from 2021 to 2022 reflects COVID-19 related workforce challenges in the overall behavioral health system - an increased number of individuals seeking care following discharge may have struggled to access lower-levels of care prompting a return to the hospital.</p> <p>Total Percent Readmitted within 180 Days. Non-Forensic State Psych Hospital: The observed increase from 2021 to 2022 reflects COVID-19 related workforce challenges in the overall behavioral health system - an increased number of individuals seeking care following discharge may have struggled to access lower-levels of care promoting a return to the hospital.</p>
20B	<p>Observed increases in re-admission of forensic clients at 30- and 180-days was likely impacted by COVID-19 generally and by workforce challenges in the overall behavioral health system - an increased number of non-forensic individuals sought care and received this care at state-hospitals, thereby reducing the number of beds available for forensic patients.</p>
20B	<p>Total Percent Readmitted within 30 Days. Forensic State Psych Hospital: The observed decrease from 2021 to 2022 largely reflects workforce challenges following COVID-19 - Due to workforce shortages, providers were unable to staff the number of beds they had available. This coupled with the high acuity of consumers being referred limited the number of admissions facilities were able to accept.</p> <p>Total Percent Readmitted within 180 Days. Forensic State Psych Hospital: The observed decrease from 2021 to 2022 largely reflects workforce challenges following COVID-19 - Due to workforce shortages, providers were unable to staff the number of beds they had available. This coupled with the high acuity of consumers being referred limited the number of admissions facilities were able to accept.</p>
21	<p>The observed increase in readmissions from 2021 to 2022 reflects both increased acuity of consumer issues and workforce challenges related to COVID-19. Since COVID-19, the Office of Children and Family Services has observed increased acuity among consumers coupled with decreased staffing capacity to serve consumers. This has resulted in challenges to complete treatment plan goals prior to discharge, and has ultimately resulted in youth and families seeking and being re-referred for the same treatment service.</p>
21	<p>The observed increase from 2021 to 2022 reflects COVID-19 related workforce challenges in the overall behavioral health system - an increased number of individuals seeking care following discharge may have struggled to access lower-levels of care prompting a return to the hospital.</p>

Errata Sheet to the 2022 URS Output Tables

This page includes clarifications and corrections to the 2022 URS Output Tables.

ACCESS DOMAIN: Adults with SMI and Children with SED Receiving Crisis Response Services, FY 2022

The table counts and percentages have been updated due to a processing error.

OUTCOMES DOMAIN: Consumer Survey Results, FY 2022

The percentages have been updated in Response Rate for “Children: U.S.” and “Adults: U.S. Average” due to a processing error.
