

## 2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

# Nevada 2022 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,180,236	5.85	24.37	59
Community Utilization per 1,000 population	7,900,059	5.84	23.53	59
State Hospital Utilization per 1,000 population	108,725	0.49	0.33	53
Other Psychiatric Inpatient Utilization per 1,000 population	433,997	-	1.53	42

Adult Employment Status	U.S.	State	U.S. Rate	States
Employed (Percent in Labor Force)*	890,626	49.2%	51.2%	58
Employed (percent with Employment Data)**	890,626	36.0%	27.2%	58

Adult Consumer Survey Measures	State	U.S. Rate	States
Positive About Outcome	76.1%	77.7%	52

Child/Family Consumer Survey Measures	State	U.S. Rate	States
Positive About Outcome	64.5%	70.7%	47

Readmission Rates:(Civil "non-Forensic" clients)	U.S.	State	U.S. Rate	States
State Hospital Readmissions: 30 Days	5,477	6.7%	7.8%	44
State Hospital Readmissions: 180 Days	13,252	16.0%	18.9%	48
State Hospital Readmissions: 30 Days: Adults	5,064	6.1%	8.0%	42
State Hospital Readmissions: 180 Days: Adults	12,250	15.6%	19.3%	46
State Hospital Readmissions: 30 Days: Children	413	22.5%	6.5%	21
State Hospital Readmissions: 180 Days: Children	1,002	27.5%	15.7%	22

Living Situation	U.S.	State	U.S. Rate	States

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

## Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

## General Notes FY 2022

### Nevada

URS Table Number	General Notes
3	One of the units at the Southern Nevada hospital was closed and there was an increased effort to use clients' private insurance while admitted to emergency rooms.
4	There was a significant increase in the number of clients admitted to the substance use recovery programs (where employment is dramatically higher than behavioral health clients) as well as a general increase in employment opportunities throughout the community.
5A	There was a significant increase in the number of clients admitted to the substance use recovery programs (where private insurance is dramatically higher than behavioral health clients).
6	The decrease in average length of stay of youth discharged from state hospitals was due to a change in how we reported Desert Willow Treatment Center (DWTC) from FY21 to FY22. Since the DWTC RTC youth are no longer included in this total for FY22, the LOS is shorter with only acute youth. An increased focus was placed using the private insurance for civil clients and the forensic clients typically have longer stays.
6	<p>An increased focus was placed using the private insurance for civil clients and the forensic clients typically have longer stays.</p> <p>An increased focus was placed using the private insurance for civil clients and placing them with community providers.</p> <p>There was a large increase in the number of substance abuse recovery clients and as COVID-19 wound down, there was a decline in discharges.</p> <p>With COVID-19 still an issue, fewer clients were seeking treatment in an office setting.</p>
6	The increase in total number of youth served in RTCs is due to a change in how we reported Desert Willow Treatment Center (DWTC) from FY21 to FY22: In FY21 we included all youth from DWTC in both their RTC and acute programs under 'State Hospital' and the Psychiatric Residential Treatment Facilities (PRTFs) were under 'RTC'. In FY22 we split up DWTC's two programs (RTC & acute) to reflect more accurately in the tables. In the 'RTC' section we included DWTC's RTC and the PRTFs in the total. DWTC acute was included in the 'State Hospital' total.
6	The decrease in average length of stay of youth discharged from state hospitals was due to a change in how we reported Desert Willow Treatment Center (DWTC) from FY21 to FY22. Since the DWTC RTC youth are no longer included in this total for FY22, the LOS is shorter with only acute youth.
7, 7A	As a result of the additional funding received related to COVID and ARPA, the state increased the funding provided to existing community providers as well as new community providers.
	As a result of the additional funding received related to COVID and ARPA, the need for other fund spending decreased.
8	The Behavioral Health Planning and Advisory Council (BHPAC) was able to meet in August 2022 and in January 2023. These meetings were held virtually, and no expenditures were made.
9, 11	Further research would need to be completed to ascertain why there is a decrease in perception of functioning and outcomes from family surveys. These surveys are a point in time snapshot. The timing of the surveys in relation to when services were rendered can greatly influence the perception of families.
12	Staffers may have inadvertently used category Non-SME instead of SMI which will need to be rectified in FY2023 as a possible training issue.
	We had a dramatic increase in clients enrolled in substance abuse treatment programs as well as greater efforts to recognize behavioral health clients with substance abuse issues.
	A new substance abuse counselor was hired at one of the facilities and therefore SUD screening has increased.
14A	Staffers may have inadvertently used category Non-SME instead of SMI which will need to be rectified in FY2023 as a possible training issue.
15	There was a large increase with staff entering unknowns. This is something we plan to address in FY2023 data.

## **Errata Sheet to the 2022 URS Output Tables**

This page includes clarifications and corrections to the 2022 URS Output Tables.

### **ACCESS DOMAIN: Adults with SMI and Children with SED Receiving Crisis Response Services, FY 2022**

The table counts and percentages have been updated due to a processing error.

### **OUTCOMES DOMAIN: Consumer Survey Results, FY 2022**

The percentages have been updated in Response Rate for “Children: U.S.” and “Adults: U.S. Average” due to a processing error.
