

2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

Oklahoma 2022 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,180,236	29.62	24.37	59
Community Utilization per 1,000 population	7,900,059	29.56	23.53	59
State Hospital Utilization per 1,000 population	108,725	0.18	0.33	53
Other Psychiatric Inpatient Utilization per 1,000 population	433,997	0.69	1.53	42

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

General Notes FY 2022

Oklahoma

URS Table Number	General Notes
3	The total number of consumers served in State Psychiatric Hospitals significantly decreased in SFY2022 due to expanded opportunities for consumers to be treated at lower levels of care, through Urgent Recovery Centers, Crisis Centers, the 988 Mental Health Lifeline, and 988 Mobile Response.
6	<p>Total Admissions to State Hospital During the Year: A combination of changes in Oklahoma led to an increase in admissions to Oklahoma's state hospital. Oklahoma's Medicaid expansion took effect in SFY2022. Following Medicaid expansion, a review of documentation is now completed by a third party / impartial staff member resulting in increased analysis of progress towards goals for people in inpatient care. Additionally, referral sources began "opening up" after COVID risk decreased. These two things lead to an effort to discharge patients at the state hospital to lower levels of care. The increase in discharges resulted in more open beds.</p> <p>During the same time Oklahoma expanded opportunities for people to be treated at lower levels of care, through Urgent Recovery Centers, Crisis Centers, the 988 Mental Health Lifeline, and 988 Mobile Response. These opportunities have also opened up bed availability at the state hospital. There has also been a focus on increasing the warm handoffs between lower levels of care and the state hospital for people that need inpatient treatment.</p> <p>All of these changes resulted in the ability of the state hospital to be able to provide services to more people in need including those who need to be admitted to the state hospital for inpatient treatment.</p>
6	Total Number of Consumers Served in Psychiatric Inpatient Settings at the beginning of the year: The increase in Consumers Served in Psychiatric Inpatient Settings at the beginning of the year is just a return to the normal numbers post COVID.
6	Total Number of Consumers Served in Residential Treatment Centers at the beginning of the year: The decrease in Consumers Served in Residential Treatment Centers at the beginning of the year is a reflection of the expanded opportunities in Oklahoma for people to be treated at lower levels of care, through Urgent Recovery Centers, Crisis Centers, the 988 Mental Health Lifeline, and 988 Mobile Response.
6	Average LOS of adults discharged from State Hospital: Oklahoma's Medicaid expansion took effect in SFY2022. Following Medicaid expansion, a review of documentation is now completed by a third party / impartial staff member resulting in increased analysis of progress towards goals for people in inpatient care. Additionally, referral sources began "opening up" after COVID risk decreased. These two things lead to an effort to discharge patients at the state hospital to lower levels of care. Because more short-term patients were discharged from the state hospital that increased the Length of Stay of those remaining in inpatient care.
6	Average LOS of adults (in facility < 1 year) who were state hospital residents at the end of the year: Oklahoma's Medicaid expansion took effect in SFY2022. Following Medicaid expansion, a review of documentation is now completed by a third party / impartial staff member resulting in increased analysis of progress towards goals for people in inpatient care. Additionally, referral sources began "opening up" after COVID risk decreased. These two things lead to an effort to discharge patients at the state hospital to lower levels of care. Because more short-term patients were discharged from the state hospital that increased the Length of Stay of those remaining in inpatient care.
6	Our state forensic hospital discharged a large number of long term patients in SFY2022. This skewed the distribution of the Length of Stay data causing increases in both the short term and long term Length of Stay measures.

URS Table Number	General Notes
7	<p>Total MHBG Expenditures: Oklahoma increased spending for Crisis and Adult Services in SFY22.</p> <p>Total Other Funds Expenditures: Oklahoma received several grants, including new CCBHC and CMHC grants and opioid grant funding, in SFY2022 that accounted for the increase in Other Funds Expenditure.</p> <p>Total EBP for ESMI Expenditures: The Total CSC-EBP for First Episode Psychosis Expenditures increased due to COVID and ARP funds that were not requested on the 2021 report.</p> <p>Total State Hospital Expenditures: New CCBHC and CMHC grants reduced the amount of state funds going to the State Hospitals.</p> <p>Total Other 24 – Hour Care Expenditures: We decreased state spending in this category for 2022 and increased our state spending in Ambulatory/Community Non-24-Hour Care Expenditures.</p> <p>Total Ambulatory/Community Non-24-Hour Care Expenditures: Medicaid expansion began in Oklahoma in FY22. We increased our state match dollars for our increased TXIX services.</p> <p>Total Administration Expenditures: Due to increased state funding and expenditures, administrative costs have also increased.</p>
7A	The CSC-EBP for First Episode Psychosis expenditures for 2022 increased due to an increased award of funds.
8	Oklahoma's block grant award increased by over \$3 million in SFY2022. Since our spending on research and evaluation and quality improvement is proportional to the spending of the block grant money there was an increase in the amount we spent on non-direct services.
14A	<p>SMI means an individual 18 years of age or older who meets the following criteria: A. Currently or at any time during the past year have had a diagnosable mental, behavioral or emotional disorder of sufficient duration to meet criteria specified within DSM-IV with the exception of "V" codes, substance use disorders, and developmental disorders, unless they co-occur with another diagnosable serious mental illness; And B. Has at least (a) moderate impairment in at least four, (b) severe impairment in two or (c) extreme impairment in one of the following areas: 1. Feeling, Mood, and Affect: Uncontrolled emotion is clearly disruptive in its effects on other aspects of a person's life. Marked change in mood. Depression and/or anxiety incapacitates person. Emotional responses are inappropriate to the situation. 2. Thinking: Severe impairment in concentration, persistence, and pace. Frequent or consistent interference with daily life due to impaired thinking. Presence of delusions and/or hallucinations. Frequent substitution of fantasy for reality. 3. Family: Disruption of family relationships. Family does not function as a unit and experiences frequent turbulence. Relationships that exist are psychologically devastating. 4. Interpersonal: Severe inability to establish or maintain a personal social support system. Lacks close friends or group affiliations. Socially isolated. 5. Role Performance: Frequent disruption of role performance and individual is unable to meet usual expectations. Unable to obtain or maintain employment and/or conduct daily living chores such as care of immediate living environment. 6. Socio-legal: Inability to maintain conduct within the limits prescribed by law, rules, and strong mores. Disregard for safety of others. Destructive to property. Involvement with law enforcement. 7. Self Care/Basic Needs: Disruption in the ability to provide for his/her own needs such as food, clothing, shelter, and transportation. Assistance required in obtaining housing, food and/or clothing. Unable to maintain hygiene, diet, clothing, and prepare food. Or 8. Has a duration of illness of at least one year and (a) at least moderate impairment in two, or (b) severe impairment in one of the following areas: 1. Feeling, Mood, and Affect: Uncontrolled emotion is clearly disruptive in its effects on other aspects of a person's life. Marked change in mood. Depression and/or anxiety incapacitates person. Emotional responses are inappropriate to the situation. 2. Thinking: Severe impairment in concentration, persistence and pace. Frequent or consistent interference with daily life due to impaired thinking. Presence of delusions and/or hallucinations. Frequent substitution of fantasy for reality. 3. Family: Disruption of family relationships. Family does not function as a unit and experiences frequent turbulence. Relationships that exist are psychologically devastating. 4. Interpersonal: Severe inability to establish or maintain a personal social support system. Lacks close friends or group affiliations. Socially isolated. 5. Role Performance: Frequent disruption of role performance and individual is unable to meet usual expectations. Unable to obtain or maintain employment and/or conduct daily living chores such as, care of immediate living environment. 6. Socio-legal: Inability to maintain conduct within the limits prescribed by law, rules, and strong mores. Disregard for safety of others. Destructive to property. Involvement with law enforcement. 7. Self Care/Basic Needs: Disruption in the ability to provide for his/her own needs such as food, clothing, shelter and transportation. Assistance required in obtaining housing, food and/or clothing. Unable to maintain hygiene, diet, clothing, and prepare food. Note: Individuals with a primary diagnosis of substance use or developmental disorder are excluded from this definition. Individuals may show less impairment if they are on medications or receiving other treatment services that reduce the symptoms of the illness, but moderate to severe impairment in functioning would result with discontinuation of the medications.</p>

URS Table Number	General Notes
14A	<p>SED: Individuals from birth to seventeen years of age who meet the following criteria comprise the target population: A. A child who possesses a diagnosable, serious disorder under DSM-IV such as pervasive developmental disorder, childhood schizophrenia, schizophrenia of adult-type manifesting in adolescence, conduct disorder, affective disorder, other disruptive behaviors, or other disorders with serious medical implications such as eating disorders, or persistent involvement with alcohol or drugs; And B. Who has a functioning level which includes: (a) a moderate impairment in at least four, (b) severe impairment in two or (c) extreme impairment in one of the following areas: 1. Feeling, Mood, and Affect: Uncontrolled emotion is clearly disruptive in its effects on other aspects of a child's life. Frustration, anger, loneliness and boredom persist beyond the precipitating situation. Symptoms of distress are pervasive and do not respond to encouragement or reassurance. 2. Thinking: Disruption of daily life due to impaired thoughts and thinking process. Inability to distinguish between fantasy and reality. Unusual thoughts or attachments to objects. 3. Substance Use: Frequent difficulties due to substance use. Repeated use of substances causing difficulty at home or in school. 4. Family: Disruption of family relationships. Family does not function as a unit and experiences frequent turbulence. Relationships that exist are psychologically devastating. Lacks family support. Abused or neglected. 5. Interpersonal: Severe inability to establish or maintain a personal social support system. Lacks close friends or group affiliations. Socially isolated. Lacks age appropriate social skills. 6. Role Performance: Frequent disruption of role performance and individual is unable to meet usual expectations. Persistent behavior problems. Failure, suspension or expelled from school. 7. Socio-legal: Inability to maintain conduct within the limits prescribed by law, rules, and strong mores. Shows little concern for consequences of actions. Delinquent acts and/or frequent contact with law enforcement. 8. Self Care/Basic Needs: The ability to care for self is considerably below expectation. 9. Caregiver Resources: Caregiver has difficulties providing for the child's basic needs or developmental needs such that there is a negative impact on the child's level of functioning. Or C. Who has a duration of illness for at least one year and has (a) functioning level of moderate impairment in at least two, or (b) severe impairment in one of the following areas: 1. Feeling, Mood, and Affect: Uncontrolled emotion is clearly disruptive in its effects on other aspects of a child's life. Frustration, anger, loneliness, and boredom persist beyond the precipitating situation. Symptoms of distress are pervasive and do not respond to encouragement or reassurance. 2. Thinking: Disruption of daily life due to impaired thoughts and thinking process. Inability to distinguish between fantasy and reality. Unusual thoughts or attachments to objects. 3. Substance Use: Frequent difficulties due to substance use. Repeated use of substances causing difficulty at home or in school. 4. Family: Disruption of family relationships. Family does not function as a unit and experiences frequent turbulence. Relationships that exist are psychologically devastating. Lacks family support. Abused or neglected. 5. Interpersonal: Severe inability to establish or maintain a personal social support system. Lacks close friends or group affiliations. Socially isolated. Lacks age appropriate social skills. 6. Role Performance: Frequent disruption of role performance and individual is unable to meet usual expectations. Persistent behavior problems. Failure, suspension or expelled from school. 7. Socio-legal: Inability to maintain conduct within the limits prescribed by law, rules and strong mores. Shows little concern for consequences of actions. Delinquent acts and/or frequent contact with law enforcement. 8. Self Care/Basic Needs: The ability to care for self is considerably below expectation. 9. Caregiver Resources: Caregiver has difficulties in providing for the child's basic needs or developmental needs such that there is a negative impact on the child's level of functioning. Note: Children with a primary diagnosis of developmental disorders are excluded from this definition. Individuals may show less impairment if they are on medications or involved in other treatment services that reduce the symptoms of the illness but moderate to severe impairment in functioning would result with discontinuation of the medications or current treatment.</p>
16	<p>Year after year, the number of people served through Supported Employment continues to increase. ODMHSAS adopted the Individual Placement and Support (IPS) model of supported employment (an Evidence-based Practice) and it has been widely implemented. It is a required evidence-based practice for all of our CCBHC's. In addition, all of the Comprehensive Community Addiction Recovery Centers (CCARC) are highly encouraged to utilize these services through the CCBHC's. Advocacy and Housing agencies are also putting IPS teams in place.</p>
17	<p>Last year, ODMHSAS had a decrease in this area. We believe that the decrease was because staff were incorrectly entering data. Training in this area was negatively impacted by COVID affecting staff retention. As COVID has begun to level out, this number has increased as staffing has stabilized and instruction in this area has been retained. Other factors affecting this area have been the CCBHC's focus on integrated care and the implementation of telehealth which has allowed a vast number of people to partake in services .</p>

URS Table Number	General Notes
20A	<p>A combination of changes in Oklahoma led to an increase in readmissions to Oklahoma's state hospital. Oklahoma's Medicaid expansion took effect in SFY2022. Following Medicaid expansion, a review of documentation is now completed by a third party / impartial staff member resulting in increased analysis of progress towards goals for people in inpatient care. Additionally, referral sources began "opening up" after COVID risk decreased. These two things lead to an effort to discharge patients at the state hospital to lower levels of care. The increase in discharges resulted in more open beds.</p> <p>During the same time Oklahoma expanded opportunities for people to be treated at lower levels of care, through Urgent Recovery Centers, Crisis Centers, the 988 Mental Health Lifeline, and 988 Mobile Response. These opportunities have also opened up bed availability at the state hospital. There has also been a focus on increasing the warm handoffs between lower levels of care and the state hospital for people that need inpatient treatment. All of these changes resulted in the ability of the state hospital to be able to provide services to more people in need including those who need to come back to the state hospital or choose to come back for inpatient treatment.</p>
20B	<p>Oklahoma's Forensic Hospital was able to discharge patients to other CJ facilities after COVID risk decreased. More these Forensic patients were then able to be readmitted to care as their cases were adjudicated .</p>
