

2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

Illinois 2022 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,180,236	2.03	24.37	59
Community Utilization per 1,000 population	7,900,059	2.03	23.53	59
State Hospital Utilization per 1,000 population	108,725	0.31	0.33	53
Other Psychiatric Inpatient Utilization per 1,000 population	433,997	-	1.53	42

Adult Employment Status	U.S.	State	U.S. Rate	States
Employed (Percent in Labor Force)*	890,626	32.1%	51.2%	58
Employed (percent with Employment Data)**	890,626	12.8%	27.2%	58

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

General Notes FY 2022

Illinois

URS Table Number	General Notes
2A, 2B, 3, 4, 5, 5A, 6, 7, 12, 14A/B, 15, 15A, 16	The state has seen a reduction in the number of consumers reported through our system as served between 2016 through 2021 as a result of better MCO coverage. Coverage in and enrollment in the ACA continues to affect service reporting by our providers as the reimbursement mechanism now flows through the MCOs for the majority of individuals served in the publicly funded mental health system. The Medicaid Authority in the State of Illinois continues to make adjustments in how MCO claims are processed. FY20 also reflects a change from the State Medicaid Authority in how they appropriate and process Non-Medicaid services.
2A, 2B, 3, 4, 5, 5A, 6, 7, 12, 14A/B, 15, 15A, 17	The data collected was based solely on SMHA claims data and did not include claims data for individuals treated in the public system whose claims are processed by MCOs. Managed Care has been implemented in Illinois for the past five years, with an increasing number of individuals' claims for publicly funded mental health care processed through the MCOs each year. As an example: In FY17, the SMHA processed claims for 64,403 individuals and the MCOs processed claims for an additional 64,066 for a combined total individuals served in the publicly funded mental health system of 128,469 in FY17.
7	The Medicaid column for "Ambulatory/Community Non-24-Hour Care" line is an estimate. The actual numbers are provided by the State Medicaid Authority and were not provided by submission date and time.
9,11,11A	The FY2022 MHSIP Surveys have not yet been conducted. As of mid-March 2020 all DMH offices were closed and Central Office employees have been working remotely from home. The survey has been completed annually by using a stratified random sample of all consumers and caregivers who had received services during the month of June. The mail survey has been completely produced, conducted and processed by DMH Central Office staff, which can only be done on site in the physical offices. In FY19, surveys were mailed to approximately 4,500 individuals and over 450 responses were received. In FY22, DMH staff have not been available to conduct the on-site activities required to produce, distribute and analyze the survey. The survey is considered a priority for immediate action upon staff returning to office. The process takes approximately 90 days so results should be available shortly after a return to almost normal conditions. The unfortunate resurgence of COVID-19 in Illinois and the current implementation of the Tier 3 Mitigations to contain the pandemic poses a serious setback and new delays on many fronts.
	DMH is currently exploring electronic and web-based approaches and methods to conducting the surveys and considering ways to streamline the survey process, make it less dependent on printing, mailing, fastidious data entry, and other clerical processes and still be able to obtain accurate results quickly.
16B	The numbers were based on the submitted Medicaid claims for each specific type of service. 24/7 Mobile Crisis Team was any claim submitted under Mobile Crisis Response and Mobile Crisis Response - Team. Crisis Stabilization was any claim submitted under Crisis Intervention or Crisis Stabilization.
17	The information collected in this table is from an indicator in the registration process for our community providers. There is not any validation on it to make sure that a Substance Use diagnosis is included.

Errata Sheet to the 2022 URS Output Tables

This page includes clarifications and corrections to the 2022 URS Output Tables.

ACCESS DOMAIN: Adults with SMI and Children with SED Receiving Crisis Response Services, FY 2022

The table counts and percentages have been updated due to a processing error.

OUTCOMES DOMAIN: Consumer Survey Results, FY 2022

The percentages have been updated in Response Rate for “Children: U.S.” and “Adults: U.S. Average” due to a processing error.
