

## 2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

# District of Columbia 2022 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,180,236	63.11	24.37	59
Community Utilization per 1,000 population	7,900,059	61.32	23.53	59
State Hospital Utilization per 1,000 population	108,725	0.57	0.33	53

**Note:****Are Client Counts Unduplicated?**

Unduplicated

**Number of States with Unduplicated Counts**

43

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

**State Notes:****Table 2a**

Age None  
Gender None  
Race None  
Overall DC had an increase in the number of people served, particularly in community programs. Various demographic sub-sets therefore had a numerical increase as well.

**Table 2b**

Age None  
Gender None  
Race None  
Overall None

## Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

## State Notes:

### Table 14a

Age	None
Gender	None
Race	None
Overall	Diagnosis data quality improved, leading to a higher number of consumers being identified as having an SMI/SED diagnosis.

### Table 14b

Age	None
Gender	None
Race	None
Overall	Diagnosis data quality improved, leading to a higher number of consumers being identified as having an SMI/SED diagnosis.

	Age NA	-	-	-	37,411	11,454	3,577	-	10.46	17

**Note:**

Admission Rate= number of admissions divided by total served during the year.

U.S. Admissions During Year uses data from states reporting data only. States are only included in "U.S. Total Served" if they also reported data on admissions.

U.S. Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Tables 3 and 6.

**State Notes:**

**Table 3**

Age	None
Gender	None
Overall	Fewer youth were served in residential treatment centers in FY22.

**Table 6**

Hospitals	Average LOS for clients with a stay greater than a year increased due to outliers (individuals with very long stays). Average LOS for people with a stay less than a year decreased due to the majority of admissions being for pre-trial individuals.
Other Inpatient	None
Residential	The number of individuals served in residential treatment centers has declined in part due to long wait lists at the facilities to which individuals are referred.
Community	The number of people served by community programs increased between FY21 and FY22. This has been a steady trend for the past three years.
Overall	None

**APPROPRIATENESS DOMAIN: Length of Stays in State Psychiatric Hospitals, Other Psychiatric Inpatient Settings, and Residential Treatment Centers, FY 2022**

**Note:**

Resident clients are clients who were receiving services in inpatient settings at the end of the reporting period.

This table uses data from URS Table 6.

**State Notes:**

State Psychiatric Hospitals Average LOS for clients with a stay greater than a year increased due to outliers (individuals with very long stays). Average LOS for people with a stay less than a year decreased due to the majority of admissions being for pre-trial individuals.

Other Psychiatric Inpatient None

Residential Treatment Centers The number of individuals served in residential treatment centers has declined in part due to long wait lists at the facilities to which individuals are referred.

Overall None

**APPROPRIATENESS DOMAIN: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/SU Disorders, FY 2022**

**District of Columbia**

**Reporting Period: 10/1/2021 To: 9/30/2022**

<b>Adults and Children who meet the Federal Definition of SMI/SED</b>	<b>State</b>	<b>US Average</b>	<b>US Median</b>	<b>States Reporting</b>
Percent of Adults served through the SMHA who meet the Federal definition for SMI	65.0%	69.7%	74.0%	57
Percent of Children served through the SMHA who meet the Federal definition for SED	48.0%	69.0%	74.0%	57

<b>Co-occurring MH and Substance Use Consumers</b>	<b>State</b>	<b>US Average</b>	<b>US Median</b>	<b>States Reporting</b>
Percent of Adults served through the SMHA who had a co-occurring MH and SU disorder	16.0%	26.4%	22.5%	56
Percent of Children served through the SMHA who had a co-occurring MH and SU disorder	0.5%	5.7%	2.5%	56
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance use diagnosis	24.0%	29.8%	24.0%	56
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance use diagnosis	0.9%	10.5%	3.0%	56

**Note:**

This table uses data from URS Table 12.

**How are the number of clients with co-occurring disorders counted and calculated?**

The denominator is all consumers with a mental health service during the fiscal year. The numerator is those who also had a service with an SUD diagnosis during the year.

**State Notes:**

None

## Note:

U.S. totals are based on states reporting.

This table uses data from URS Table 15.

U.S. totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

## State Notes:

The number of people with Not Available data increased because DC served a higher number of people and also ensured all unduplicated people served were included in the table.

What populations are reported? All Clients Number of States Reporting All Clients: 34 Number of States Reporting Some Clients: 12

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
DC	-	-	-	Yes	-
US	35	19	3	8	19

## Note:

\*In Labor Force is the sum of consumers employed and unemployed.

\*\*With Known Employment Status is the sum of consumers employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS Table 4.

## State Notes:

Age None  
Gender None  
Overall DC improved employment data quality and reduced the number of people for whom information was not available. This led to improved data quality for the number of people who were unemployed.

**OUTCOMES DOMAIN: Employment Status of Adult Mental Health Consumers Served in the Community by Diagnosis, FY 2022**

**District of Columbia**

**Reporting Period: 10/1/2021 To: 9/30/2022**

Diagnosis	State				Employed as a % of Labor Force		Employed as % of Known Employment Status		% of Consumers with Dx		States Reporting
	Employed	Unemployed	In Labor Force*	With Known Employment Status**	State	US	State	US	State	US	
Schizophrenia and Related Disorders	319	2,656	2,975	3,925	10.7%	32.4%	8.1%	11.8%	14.7%	12.8%	54
Bipolar and Mood Disorders	131	475	606	768	21.6%	52.2%	17.1%	28.5%	2.9%	37.5%	54
Other Psychoses	29	151	180	218	16.1%	31.9%	13.3%	15.6%	0.8%	2.0%	53
All other Diagnoses	4,030	13,898	17,928	21,835	22.5%	56.3%	18.5%	32.0%	81.6%	39.3%	54

## General Notes FY 2022

### District of Columbia

URS Table Number	General Notes
2A	DC had an approximately 8% increase in the number of people served, particularly in community programs. Various demographic sub-sets, therefore, had a numerical increase as well. In addition, DC improved data quality in FY22, revealing an undercount of people served in FY21.
3	DC had an approximately 8% increase in the number of people served, particularly in community programs. Various demographic sub-sets therefore had a numerical increase as well. In addition, DC improved data quality in FY22, revealing an undercount of people served in FY21.
4	DC improved employment data quality and reduced the number of people for whom information was not available. This led to improved data quality for the number of people who were unemployed.
5A	DC improved the quality of non-Medicaid data and was, therefore, able to identify more people who had both Medicaid and non-Medicaid-funded services, as well as non-Medicaid only. Totals also increased due to more people being served in FY22 than FY21, as well as data quality improvements.
7	Total Medicaid Expenditures: Expenditures previously reported failed to capture other related expenditures reported outside the Children Services Divisions prior to DBH's alignment.
7	Total Other Expenditures: Expenditures previously reported also captured other un-related expenditures reported within the Programs prior to DBH's alignment.
7	Total Primary Prevention Expenditures: Expenditures previously reported failed to capture other related expenditures reported outside the Children Services Divisions prior to DBH's alignment.
7	Total EBP for ESMI Expenditures: Expenditures previously reported also captured other un-related expenditures reported within the Programs prior to DBH's alignment.
7	Total Other 24-Hour Care Expenditures: Expenditures miscategorized in previous year.
7	Total Ambulatory/Community Non-24 Hour Care Expenditures: Expenditures previously reported also captured other un-related expenditures.
7	Total Administration Expenditures: Includes one-time temporary increase of Federal ARPA funds.
7A	Practices for First Episode Psychosis Expenditures: Expenditures overstated in previous year but right sized and accurately captured in FY 22.
8	Total MHBG Expenditures for Non-Direct Service Activities: Explained by the addition of COVID/ARPA Block supplemental grant awards expenditures.
9	There has been continued expansion of DC's school behavioral health programs, which may have positively impacted responses for social connectedness and functioning. Qualitative feedback also indicated fewer concerns about the availability of staff.
10	DC did not have providers/agencies that directly received MGBH funds in FY22.
11	There has been continued expansion of DC's school behavioral health programs, which may have positively impacted responses for outcomes. Qualitative feedback also indicated fewer concerns about the availability of staff. Feedback about telemedicine was largely positive.
12	The logic for determining people with co-occurring diagnoses changed from FY21 to FY22, causing the percentage to decrease. In FY22, co-occurring diagnoses were used. In FY21, any historical SUD service was used.
15	The number of people with a living situation of Private Residence increased because DC served a higher number of people and improved data quality between FY21 and FY22.
16B	DC does not collect diagnosis data for people who call the crisis line, so data for the SMI/SED population cannot be reported on specifically. Overall crisis data was undercounted because only individuals who received crisis services and had a diagnosis of SMI/SED were counted. Many more people received various crisis services but were not identified as having an SMI/SED diagnosis.

## **Errata Sheet to the 2022 URS Output Tables**

This page includes clarifications and corrections to the 2022 URS Output Tables.

### **ACCESS DOMAIN: Adults with SMI and Children with SED Receiving Crisis Response Services, FY 2022**

The table counts and percentages have been updated due to a processing error.

### **OUTCOMES DOMAIN: Consumer Survey Results, FY 2022**

The percentages have been updated in Response Rate for “Children: U.S.” and “Adults: U.S. Average” due to a processing error.
