

2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

Hawaii 2022 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,180,236	6.39	24.37	59

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

	Age NA	20	-	31	37,411	11,454	3,577	0.65	10.46	17

Note:

Admission Rate= number of admissions divided by total served during the year.

U.S. Admissions During Year uses data from states reporting data only. States are only included in "U.S. Total Served" if they also reported data on admissions.

U.S. Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Tables 3 and 6.

State Notes:

Table 3

Age None
Gender None
Overall Populated by the BHSIS Project Office using HI's 2022 MH-CLD BCI dataset.

Table 6

Hospitals None
Other Inpatient For adults, neither admission/discharge dates nor specific days of service delivery are collected for these providers. Until more complete data become available these figures will not be provided.
Residential For adults, neither admission/discharge dates nor specific days of service delivery are collected for these providers. Until more complete data become available these figures will not be provided.
Community For adults, discharge and admission data are no longer collected at contracted providers.
Overall For adults for all service settings except the state hospital, there are discharge and service data missing. This is due to a change in the MIS system used to track services at contracted providers.

Hawaii

URS Table Number	General Notes
5A	AMHD - During the COVID-19 pandemic response, the Division's efforts to address mental health and crisis responses statewide included a period of time when insurance verification was deprioritized in order to rapidly provide services to consumers. In FY22, the Division rectified the funding sources resulting in an increase in Medicaid and Non-Medicaid only consumers and a decrease in both funding sources.
6	<p>Comments on Data (Other Inpatient): For adults, neither admission/discharge dates nor specific days of service delivery are collected for these providers. Until more complete data become available these figures will not be provided.</p> <p>Comments on Data (Residential Treatment): For adults, neither admission/discharge dates nor specific days of service delivery are collected for these providers. Until more complete data become available these figures will not be provided.</p> <p>Comments on Data (Community Programs): For adults, discharge and admission data are no longer collected at contracted providers.</p> <p>Comments on Data (Overall): For adults for all service settings except the state hospital, there are discharge and service data missing. This is due to a change in the MIS system used to track services at contracted providers.</p>
7	<p>MHBG expenditures: AMHD - As contracts were executed, more MHBG were expended for direct services vs. non-direct services.</p> <p>Medicaid expenditures: CAMHD had lower utilization due to staffing issues.</p> <p>Ambulatory/Community Non-24 Hour care expenditures: AMHD - In FY21, non-24 hour crisis services were included in Total Ambulatory/Community Non-24-hour care. In FY22, crisis service expenditures were reported as a separate activity. In FY22, as more services began opening up again and accepting new consumers, expenditures increased.</p>
8	AMHD - As contracts were executed, more MHBG were expended for direct services vs. non-direct services.
11	The sample size for FY22 was very small compared to previous years. The percentage reporting positively for all domains in the survey decreased except Satisfaction domain which has remained the same in FY22 and FY21. The percentage of adults reporting positively about outcomes is unusually low but we have seen fluctuations in the past.
12	<p>AMHD - Includes three most recent dx for SUD and MHD per consumer. In the past "ever had SUD" was used.</p> <p>CAMHD - New youth are less likely to have a SA dx at admission, which is possibly due to a slight shift in demographics as referrals are shifting to be more from schools post COVID.</p>
14A	AMHD - Primary race used for clients new in FY22 and continuing client's assigned last year's race if identified as multi-racial.
15	AMHD - There is a potential variance in QOLI data for residence, only CMHC and HSH QOLI used for FY22.
16	<p>AMHD - Included housing services provided by SMHA other than those explicitly called "supported housing", for example group homes and LCRS. FY21 only used explicitly labeled "supported housing."</p> <p>CAMHD - TFC & MST - Lower utilization due to staffing issues.</p> <p>AMHD - There was an error in coding claims since Hawaii doesn't provide ACT services. Hawaii provides a similar service ICM+ but not ACT by definition.</p>
17	AMHD - Assumed any consumer with a dual dx was technically receiving dual dx services.

Errata Sheet to the 2022 URS Output Tables

This page includes clarifications and corrections to the 2022 URS Output Tables.

ACCESS DOMAIN: Adults with SMI and Children with SED Receiving Crisis Response Services, FY 2022

The table counts and percentages have been updated due to a processing error.

OUTCOMES DOMAIN: Consumer Survey Results, FY 2022

The percentages have been updated in Response Rate for “Children: U.S.” and “Adults: U.S. Average” due to a processing error.
