

## 2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

Unduplicated

**Number of States with Unduplicated Counts**

43

Duplicated between children and adults

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

## Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

## General Notes FY 2022

### Delaware

URS Table Number	General Notes
3	Table 3 does not include "Age Not Found" category.
4	Table 4 includes "Age Not Found" category.
3, 4	The 18 clients difference between the two tables is comprised of the Clients found in the "Age Not Found" category.
4	There has been an overall decrease in the number of CRFs received by the providers in 2022 than in 2021 primarily because of technical issues and ownership changes at the provider level.
5a	<p>Prior to February 2017, providers were not required to complete CRFs for Medicaid clients.</p> <p>Due to this policy change in February 2017, DSAMH began collecting information on all clients regardless of payer source. This led to an increase in clients and episodes of treatment in all program types.</p> <p>Since 2017, data collection for Medicaid clients has increased in accuracy.</p> <p>Total number of consumers with both Medicaid and Non-Medicaid Funding: Additionally, since 2020 there has been a reduction in the number of CRFs received by some providers.</p>
6	<p>The total number of mental health clients served in beginning of 2022 increased from 2021 as a result of having less discharges during the prior year than admissions during the prior year.</p> <p>The State Hospital has experienced a multi-year reduction in admissions due in large part to an increase in alternative options that have led to more individuals being diverted to more appropriate services. This has led to both a decrease in the number of admissions each year as well as eliminating short LOSs for clients inappropriately placed in the facility.</p> <p>Since 2017, DPC has been transitioning to an acute facility serving clients short term (30 days or less).</p> <p>The total number of consumers Served in the Community Programs and Residential Treatment Centers: The main driver of the overall increase in the total clients served is a result of a huge uptick in child patient CRFs submitted at the provider level. More child clients were served. Note: Adult clients served metrics are relatively consistent in 2022 compared to 2021.</p> <p>The total Admissions and Discharges in the Residential Treatment Centers: Received more CRF's at the provider level for adult clients. The main driver of this increase is the on boarding of more providers providing this service. Therefore, more adult clients were served.</p> <p>The total consumers Served for Other Psychiatric Inpatient: Received more CRFs at the provider level for both adult and child clients. The main driver is just an increase of clients seeking treatment.</p> <p>The total Admissions to Other Psychiatric Inpatient During the Year: The main driver for the increase in admissions is due to a substantial increase in CRFs for child patients. More child clients were served. Note: Adult clients served metrics are relatively consistent in 2022 compared to 2021.</p>
7	The total state expenditures for SFY 22 were \$98,888,493. For ESMI/FEP there was a decrease in expenditures for the SFY as the vendor had experienced a significant shortage in referrals. DSAMH is working on expanding outreach and referral linkages along with expanding programing for this population.
7a	The total state expenditures for SFY 22 were \$98,888,493. For ESMI/FEP there was a decrease in expenditures for the SFY as the vendor had experiences a significant shortage in referrals. DSAMH is working on expanding outreach and referral linkages along with expanding programing for this population.
8	Administration's decision to reduce shift expenditures on training, education, QA/PI to other funding sources.
11	In regard to the decrease in positive responses, based on our analysis, it is a result of a number of survey responses in the positive domains lacking being left blank by respondents, and as a result this led to a decrease in valid responses. The Child's Department did not provide a sample size count in their submission.
12	Children's Department - Because the population is so small, any change will cause a drastic change in percentage.
14a	Total number of Asian consumers with SMI/SED: there was an increase in clients seen within this consumer profile at the provider level.
	Total number of multi-racial consumers with SMI/SED: there was an increase in clients seen within this consumer profile at the provider level.
15	The main driver for the change in the total number of consumers in Jail/Correctional Facility is an overall increase in clients seen at the provider level.

URS Table Number	General Notes
16	There has been an overall decrease in the number of CRFs received by the providers in 2022 than in 2021 primarily because of technical issues and ownership changes at the provider level.
16	Data submission issues at some providers account for the majority of the reported decrease in participation in particular programs.
17	Providers saw an increase in the number of patients seeking SMI treatment in FY 2022 compared to FY 2021.
20a	The population is so small that any change will cause a drastic change in percentage.

## **Errata Sheet to the 2022 URS Output Tables**

This page includes clarifications and corrections to the 2022 URS Output Tables.

### **ACCESS DOMAIN: Adults with SMI and Children with SED Receiving Crisis Response Services, FY 2022**

The table counts and percentages have been updated due to a processing error.

### **OUTCOMES DOMAIN: Consumer Survey Results, FY 2022**

The percentages have been updated in Response Rate for “Children: U.S.” and “Adults: U.S. Average” due to a processing error.
