

2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

Kentucky 2022 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,180,236	33.02	24.37	59
Community Utilization per 1,000 population	7,900,059	32.91	23.53	59
State Hospital Utilization per 1,000 population	108,725	1.00	0.33	53

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

APPROPRIATENESS DOMAIN: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/SU Disorders, FY 2022

Kentucky

Reporting Period: 7/1/2021 To: 6/30/2022

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	-	69.7%	74.0%	57
Percent of Children served through the SMHA who meet the Federal definition for SED	-	69.0%	74.0%	57

Co-occurring MH and Substance Use Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and SU disorder	18.0%	26.4%	22.5%	56
Percent of Children served through the SMHA who had a co-occurring MH and SU disorder	1.0%	5.7%	2.5%	56
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance use diagnosis	7.0%	29.8%	24.0%	56
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance use diagnosis	1.0%	10.5%	3.0%	56

Note:

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

Percentages of children/adolescents and adults who also have a co-occurring substance use disorder are from AMART—client counts with both MH and SA record markers = true divided by total children and adults served. Percentages of children/adolescent with SED and adults with SMI whose also have co-occurring substance use disorder is calculated by dividing the total number of children/adolescents with SED and adults with SMI with both a MH and SA (per CMHC_Cert_BB6 and CMHC_Cert_B4) by the total number of children/adolescents with SED and total number of adults with SMI (per AMART).

Forensics included in "non forensic" data? No

Note:

U.S. totals are based on states reporting.

This table uses data from URS Tables 20a and 20b.

State Notes:

KCPC serves adults only and is the only state supported forensic psychiatric facility in Kentucky.

Kentucky

URS Table Number	General Notes
6	The difference between 61 and 74 is 13 individuals which represents 21% change. Thirteen individuals is a relatively small n of persons in the hospital on the first day of the year even though the percentage is 21%. This number of persons in the hospital on the first day of the year alone is not an accurate picture of the volume served throughout the year and has relatively low value. We observe that this number varies widely across years; relatively speaking, 13 is a small change. We will continue to monitor multiple year changes as future URS table 6s are completed.
7	<p>Total Other (Federal) Funds Expenditures – We received additional Federal grants that we began contracting in SFY22.</p> <p>Total Local Funds Expenditures – In SFY22, the Medicare Part C hospital expenses were broken out from the Private Insurance expenses that were previously reported in the Local Funds column. The Medicare Part C expenses are now included in the Other Federal Funds column.</p> <p>Total Other Expenditures – We received increased funds from outside agencies that we were able to utilize in SFY22.</p> <p>Total EBP for ESMI Expenditures – The MHBG CRRA and ARPA expenses were for the first time included on the SFY22 table design.</p> <p>Total Administration Expenditures – The administration expenses for our nursing facilities was mistakenly left out of the SFY21 table. Had those been correctly reported, the variance between the SFY22 and SFY21 amounts would have been 4%.</p>
7A	The MHBG CRRA and ARPA expenses were for the first time included on the SFY22 table design.
8	Kentucky developed some additional partnerships for MH work, and more training was provided through existing partnerships due to the lifting of COVID pandemic restrictions.
14A	<p>SMI Definition: As defined in KRS 210.005, "chronic" (mental illness) means that clinically significant symptoms of mental illness have persisted in the individual for a continuous period of at least two (2) years, or that the individual is presently and significantly impaired in his ability to function socially or occupationally or both; and 2. Have a diagnosis of a major mental disorder (other than substance abuse of mental retardation as the sole diagnosis) as included in the DSMIIIR classification under Schizophrenic Disorder, Psychotic Disorders, Mood Disorder, Organic Mental Disorders or Delusional (paranoid) Disorders. Personality disorders shall be considered only when information and history depict that the individual exhibit persistent disability and significant impairment in major areas of community living.</p> <p>SED Definition: A child who is under age 18 or under age 21 and was receiving mental health services prior to age 18 and the services must be continued for therapeutic benefit; and 2. Has a clinically significant disorder of thought, mood, perception, orientation, memory, or behavior that is listed in the current edition of the American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders; and presents substantial limitations which have persisted for at least one year, or are judged by a mental health professional to be at high risk of continuing for one year without professional intervention in at least two of these five areas: Self Care, Interpersonal Relationships, Family Life, Self-Direction, Education or is a Kentucky resident and is receiving residential treatment for an emotional disability through the interstate compact; or has been removed from the home by the Department for Community Based Services (Kentucky's child welfare agency) and has been unable to maintained in a stable setting due to a behavioral or emotional disability.</p>
15	Similar to the response provided on Table 3 (increase hospital admissions and decreased served by CMHCs), the increase in number reflects the health of our clients served by our CMHCs during 2022. We will continue to study the health of our populations served for a better understanding of the apparent poor outcomes seen during SY22.

URS Table Number	General Notes
16	<p>Supportive Housing: Kentucky guides implementation through SAMHSA's Permanent Supportive Housing Toolkit. Kentucky SMHA does not provide fidelity reviews. However, CMHC contract language requires an annual self-assessment for providers.</p> <p>Supported Employment: Kentucky SMHA supports implementation of the Individual Placement and Support Model of SE through contract staff at local university who train and coach on a regular basis based on results of regular fidelity reviews across the state. The IPS fidelity tool that originated at Dartmouth and now exists through Westat is used for implementation.</p> <p>Assertive Community Treatment: Kentucky utilizes the DACTS fidelity tool and SMHA staff provide fidelity reviews.</p>
16	<p>Workforce issues related to the pandemic persist among our providers across the state including the CMHCs and we continue to assist with creating strategies to address workforce issues in the field.</p> <p>The reduction in SE and TFC reflects that fewer Community Mental Health Center programs have less capacity to provide these services.</p>
20A, 21	<p>Hispanic is reported as race by Facilities. "Asian" and "Pacific Islander" are reported as same category by Facilities; "Hawaiian" is not collected by facilities.</p>
20B	<p>The change is due to a difference between seven 180-day readmissions in SFY21 and three 180-day readmissions in SFY22. The change in percent is due to a small N.</p>
