

## 2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

# Wisconsin 2022 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,180,236	11.97	24.37	59
Community Utilization per 1,000 population	7,900,059	11.75	23.53	59
State Hospital Utilization per 1,000 population	108,725	1.04	0.33	53
Other Psychiatric Inpatient Utilization per 1,000 population	433,997	0.14	1.53	42

Unduplicated

**Number of States with Unduplicated Counts**

43

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

## Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

What populations are reported?

Number of States Reporting All Clients:

34

Number of States Reporting Some Clients:

12

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
WI	Yes	Yes	-	-	every 6 months as long as the consumer is participating
US	35	19	3	8	19

## Note:

\*In Labor Force is the sum of consumers employed and unemployed.

\*\*With Known Employment Status is the sum of consumers employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as a % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS Table 4.

## State Notes:

Age None  
Gender None  
Overall Populated by BHSIS Project Office using WI's 2022 MH-CLD BCI dataset.

## General Notes FY 2022

### Wisconsin

URS Table Number	General Notes
4	The methodology used to query employment status was updated and resulted in more employment statuses included in the analysis for this year.
7	<p>The "Total Other Funds Expenditures" decreased significantly from 2021 due to discretionary grants that had ended, several contracts that had not been implemented in 2022 due to staff turnover, and several grants with a majority of spending reported in 2021 compared to 2022.</p> <p>The increase in "Total EBP for ESMI Expenditures" from 2021 is due to annual variation in funding and spending. In 2021 there was underspending by some grantees who receive funding to provide CSC services, likely due to the ongoing COVID-19 pandemic. In 2022, in addition to the COVID-19 pandemic becoming less impactful on behavioral health services, Wisconsin was also able to award additional MHBG funding to CSC providers in Wisconsin to provide these services.</p> <p>The decline in "Total Other 24 Hour Care" in 2022 in comparison to 2021 is due to variability in available data. We were unable to get data from Medicaid in 2022 for Other 24 hour care, which we did have for 2021.</p> <p>A portion of the increase in "Administration Expenses" from 2021 is due to the request to include MHBG CAA and ARPA administrative expenses in 2022 which were not reported in 2021. The balance of the increase is due to greater administrative expenditures for our discretionary grants in 2022.</p>
7A	The increase in "Total CSC-Evidence-Based Practices Expenditures" from 2021 is due to annual variation in funding and spending. In 2021 there was underspending by some grantees who receive funding to provide CSC services, likely due to the ongoing COVID-19 pandemic. In 2022, in addition to the COVID-19 pandemic becoming less impactful on behavioral health services, Wisconsin was also able to award additional MHBG funding to CSC providers in Wisconsin to provide these services.
9, 11, 11A	The consumer satisfaction surveys were administered to a larger sample of participants this year which may have resulted in varying scores compared to previous years.
9, 11, 11A	The satisfaction surveys are administered by the local mental health programs. They then submit the surveys to a web application from which the state can export data. The agencies only submit responses, not the total number of surveys attempted. The surveys are administered on an annual basis. The data submitted on these tables are for calendar year 2021.
14A, 14B	State definition of SMI/SED is similar to the federal definition, but worded differently: "Persons in need of ongoing, high intensity, comprehensive services - have a primary diagnosis of a major mental illness or severe emotional disturbance, and they have substantial needs for psychiatric and medical treatment, including substance abuse, daily living skills, budgeting, job training, family support and support at school. Some may have a history of trauma, such as physical or sexual abuse or neglect, which contributes to the mental health problem. Persons in this category may need help to access community resources, such as safe, affordable housing, benefits and entitlements, and legal assistance. They need support and assistance in combating stigma and discrimination. Without ongoing, comprehensive services, these persons will be at the highest risk for increased psychiatric hospitalizations or extensive reliance on placement in nursing homes, child-caring institutions, and other supervised settings; confinement in jail; homelessness; and increased harm to self. These persons will sometimes experience acute psychiatric crises as a result of increases in symptoms of mental illness or environmental stresses. Because some may be reluctant to access mental health or other services, extensive outreach may be needed to engage them into services. The person and family need ongoing, comprehensive treatment and intensive community support and wraparound services to help them achieve and maintain a more stable level of functioning and a lifestyle relying more on natural supports and less on formal mental health services." State definition also includes this group: "Persons in Need of Ongoing Low Intensity Services - have a diagnosed mental disorder. They function in a fairly stable manner but may occasionally experience acute psychiatric crises. Some may have a history of trauma, such as physical or sexual abuse or neglect, which contributes to the mental health problem. These persons need services such as ongoing medication management (prescription, evaluation, and monitoring), case management, and/or periodic support contacts. With the benefit of such services, they are usually able to live relatively independently and have good potential for recovery and increasing success in community living. Without ongoing supports and services, however, they can be at a serious risk for relapse and for much more costly treatment, including intensive crisis intervention and psychiatric hospitalization."

URS Table Number	General Notes
15	The methodology used to query living situation was updated and resulted in more living situations included in the analysis for this year.
16, 17	Each program throughout the state varied in their own measures of fidelity.
16B	<p>We have data on the number of crisis calls made in 2021, but not the unique number of individuals, nor any of their characteristics. There were 21,533 crisis calls made in 2021.</p> <p>Our data collection system has a category of service for crisis services that excludes crisis behavioral centers and crisis calls. However, it may cover some other crisis services- not just 24/7 mobile crisis teams. The total number of these services was used for the 24/7 Mobile Crisis Team fields. We are unable to estimate percent access to these services at this time.</p>

## **Errata Sheet to the 2022 URS Output Tables**

This page includes clarifications and corrections to the 2022 URS Output Tables.

### **ACCESS DOMAIN: Adults with SMI and Children with SED Receiving Crisis Response Services, FY 2022**

The table counts and percentages have been updated due to a processing error.

### **OUTCOMES DOMAIN: Consumer Survey Results, FY 2022**

The percentages have been updated in Response Rate for “Children: U.S.” and “Adults: U.S. Average” due to a processing error.
