

2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

Massachusetts 2022 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,180,236	3.49	24.37	59
Community Utilization per 1,000 population	7,900,059	3.44	23.53	59
State Hospital Utilization per 1,000 population	108,725	0.09	0.33	53
Other Psychiatric Inpatient Utilization per 1,000 population	433,997	0.04	1.53	42

Adult Employment Status	U.S.	State	U.S. Rate	States
Employed (Percent in Labor Force)*	890,626	-	51.2%	58
Employed (percent with Employment Data)**	890,626	-	27.2%	58

Adult Consumer Survey Measures	State	U.S. Rate	States
Positive About Outcome	62.3%	77.7%	52

Child/Family Consumer Survey Measures	State	U.S. Rate	States
Positive About Outcome	60.5%	70.7%	47

Readmission Rates:(Civil "non-Forensic" clients)	U.S.	State	U.S. Rate	States
State Hospital Readmissions: 30 Days	5,477	13.9%	7.8%	44

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Overall See General Comments section.

APPROPRIATENESS DOMAIN: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/SU Disorders, FY 2022

Massachusetts

Reporting Period: 7/1/2021 To: 6/30/2022

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	85.0%	69.7%	74.0%	57
Percent of Children served through the SMHA who meet the Federal definition for SED	42.0%	69.0%	74.0%	57

Co-occurring MH and Substance Use Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and SU disorder	22.0%	26.4%	22.5%	56
Percent of Children served through the SMHA who had a co-occurring MH and SU disorder	2.0%	5.7%	2.5%	56
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance use diagnosis	23.0%	29.8%	24.0%	56
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance use diagnosis	3.0%	10.5%	3.0%	56

Note:

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

The calculation for the percentage of persons with a co-occurring diagnosis of substance use is obtained by counting the number of persons with a diagnosis of substance use on file in the Mental Health Information System (MHIS) as of the close of the reporting period divided by the total served as reported in Table 2 (Total Served) and Table 14 (Total SMI/SED), for whom there was a diagnosis on file in MHIS as of the close of the reporting period

Massachusetts

URS Table Number	General Notes
4	Persons enrolled in DMH's major program, Adult Community Clinical Services (ACCS), receive employment support from the Massachusetts Rehabilitation Commission (Massachusetts' vocational rehabilitation agency). DMH and MRC executed a Data Use Agreement which will permit MRC to provide DMH with person-level data on employment status in the future. DMH and MRC are working on implementation of this agreement.
4A	Persons enrolled in DMH's major program, Adult Community Clinical Services (ACCS), receive employment support from the Massachusetts Rehabilitation Commission (Massachusetts' vocational rehabilitation agency). DMH and MRC executed a Data Use Agreement which will permit MRC to provide DMH with person-level data on employment status in the future. DMH and MRC are working on implementation of this agreement.
5A	Data required for this table includes Medicaid data. DMH just started receiving Medicaid data since the state's Medicaid agency is a separate organization than DMH. Challenges exist in reconciling data with DMH data. As a result, DMH will be unable to complete this table for FY22.
5B	Data required for this table includes Medicaid data. DMH just started receiving Medicaid data since the state's Medicaid agency is a separate organization than DMH. Challenges exist in reconciling data with DMH data. As a result, DMH will be unable to complete this table for FY22.
6	Coding changes implemented for this year's URS reports improved accuracy of Table 6. Even with the coding change, DMH noticed an increase in inpatient admissions and discharges over the course of the year. This may be attributed to greater need coming out of the COVID pandemic. Also, efforts to move clients from inpatient settings to other settings like Respite programs may contribute to the decrease in the average length of stay. Under Residential Treatment Centers: The total number of unduplicated consumers served in RTCs at the beginning of FY22 (68) was higher than the 55 reported at the beginning of FY21. The increase may be a result of IRTPs and CIRT experiencing a increases in capacity back to levels before the COVID outbreaks.
7	Methodological changes exist in how some of the funds were categorized. One program, PROGRAM OF ASSERTIVE COMMUNITY TREATMENT (PACT), is included in the evidence-based practices spending (\$13.4M) which was not done in previous years. This results in higher EBP for ESMI Expenditure (table 7) and CSC- Evidence Based Practices for First Episode Psychosis Expenditure (table 7a). Also, the difference between FY21 and FY22 Other column is due to anti-ligature spending in FY21.
7A	Methodological changes exist in how some of the funds were categorizes. One program, PROGRAM OF ASSERTIVE COMMUNITY TREATMENT (PACT), is included in the evidence-based practices spending (\$13.4M) which was not done in previous years. This results in higher EBP for ESMI Expenditure (table 7) and CSC- Evidence Based Practices for First Episode Psychosis Expenditure (table 7a)
8	Additional COVID Supplemental and ARPA funds are included in the table.
12	The calculation for the percentage of persons with a co-occurring diagnosis of substance abuse is obtained by counting the number of persons with a diagnosis of substance use on file in the Mental Health Information System (MHIS) as of the close of the reporting period divided by the total served as reported in Table 2 (Total Served) and Table 14 (Total SMI/SED), for whom there was a diagnosis on file in MHIS as of the close of the reporting period. Coding changes this year in those with SED/SMI and substance use most likely contributed to the 1% point drop in the rate from last year.

URS Table Number	General Notes
14A	<p>To meet the clinical criteria to receive DMH services, individuals 22 years of age or older, must have a serious, and persistent mental illness that, except as provided in 104 CMR 29.04(3)(c), meets the criteria for the following qualifying diagnostic categories specified within the current edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM): 1. Schizophrenia Spectrum and other Psychotic Disorders; 2. Bipolar and Depressive Disorders; 3. Anxiety Disorders; 4. Dissociative Disorders; 5. Feeding and Eating Disorders; 6. Borderline Personality Disorder; 7. Obsessive-compulsive and Related Disorders; 8. Trauma and Stressor Related Disorders; and which mental illness is the primary cause of functional impairment that substantially interferes with or limits the individual's performance of one or more major life activities, and is expected to do so in the succeeding year.</p> <p>To meet the clinical criteria to receive DMH services, individuals younger than 22 years old at the time of application, must have a serious emotional disturbance that, except as provided in 104 CMR 29.04(3)(c)(2), meets diagnostic criteria for a diagnosis specified within the current edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM), which is the primary cause of functional impairment that substantially interferes with or limits the individual's performance of one or more major life activities, and is expected to do so in the succeeding year. (c) Non-qualifying Disorders. 1. The following diagnoses do not qualify as the primary cause of functional impairment for the purpose of adult service authorization: a. Under Bipolar and Depressive Disorders: Persistent Depressive Disorder (Dysthymia), Disruptive Mood Dysregulation Disorder and Premenstrual Dysphoric Disorder; b. Under Anxiety Disorders: Separation Anxiety Disorder and Selective Mutism; c. Under Feeding and Eating Disorders: Binge Eating DO; d. Under Obsessive Compulsive and Related Disorders: Hoarding DO; 3/31/23 (Effective 12/23/22) 387 EMERGENCY 104 CMR: DEPARTMENT OF MENTAL HEALTH 29.04: continued e. Under Trauma and Stressor Related Disorders: Adjustment Disorders; f. Other diagnoses identified in interpretive guidelines that may be issued by the Department. 2. The following diagnoses do not qualify as the primary cause of functional impairment for the purpose of service authorization for any individual of any age: a. Neurodevelopmental Disorders; b. Neurocognitive Disorders; c. Mental Disorders Due to a Another Medical Condition (e.g., traumatic brain injury); d. Substance-related/Induced and Addictive Disorders; e. Disruptive, Impulse Control and Conduct Disorders; or f. Other diagnoses identified in interpretive guidelines that may be issued by the Department.</p>
16	The large percentage drop in Therapeutic Foster care and MST services is due to a very small number of individuals in this serviced in any given year. The change of one individual caused a large percentage change. Also, rule changes by SAMHSA on the records that count as having a SED diagnosis could be contributing to the difference.
16B	DMH cannot complete this table as it does not have the data requested for the table available at this time. Massachusetts is undertaking a Behavioral Health redesign which will include a Behavioral Health Help Line.
17	Although these EBPs may be provided in some DMH programs, they are not reported as discrete services in the Mental Health Information System (MHIS) and are unavailable for reporting.
20B	Transfers from one DMH facility to another DMH facility may appear as discharges reflected in the 2 percentage point difference in the 30 day readmission rate from FY21 and the 4 percentage point difference in the 180 day readmission rate from FY21. Increases in forensic evaluation admissions in FY22 is part of this difference.
21	DMH understands the completion of Table 21 is optional and does not complete Table 21 given the difference in how DMH defines SMI and SED from the federal definition.

Errata Sheet to the 2022 URS Output Tables

This page includes clarifications and corrections to the 2022 URS Output Tables.

ACCESS DOMAIN: Adults with SMI and Children with SED Receiving Crisis Response Services, FY 2022

The table counts and percentages have been updated due to a processing error.

OUTCOMES DOMAIN: Consumer Survey Results, FY 2022

The percentages have been updated in Response Rate for “Children: U.S.” and “Adults: U.S. Average” due to a processing error.
