

## 2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

## Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

**General Notes FY 2022**

**Arkansas**

URS Table Number	General Notes
5A	More consumers were able to be served through Medicaid in 2022 than in 2021.
6	Decrease in discharges due to units on quarantine/positive COVID cases at the State Hospital. Limited beds available at the State Hospital means that if clients can't discharge, no new admissions are available, thus increasing the average LOS.
7	Total State Funds: Increase in Forensic Evaluations and FORP expenses and increase in State General Revenue (SGR) expenses to operate Arkansas State Hospital (ASH) (increase in nursing and physician services and Overtime increased for nurses).
7	Total Local Funds: Decrease in Local Fund revenue decrease expenses in local funds.
7	Total Other: Crisis Stabilization Units expenses were changed to Other funds mid-year to cover increases in ASH expenses.
7	Total Other 24-Hour Care: Increase in rates for Medicaid PASSE participants increased the expenses.
14A	The new data collection system and report captures this information directly from providers. The state reports the aggregate data reported by providers.
16	Arkansas' reimbursement rate is low and there are few evidence based supported housing and employment staff at Arkansas' behavioral health agencies to provide these services.
17	Increase in psychoeducation is noted as 2 of the larger agencies have been providing this service more in the previous years. However, our current data collection does not differentiate if this is for any specific population of clients. Increase in Integrated services due to Medicaid now paying for some outpatient SUD services which is capturing more co-occurring individuals.
