

2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

South Dakota 2022 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,180,236	19.14	24.37	59
Community Utilization per 1,000 population	7,900,059	19.14	23.53	59
State Hospital Utilization per 1,000 population	108,725	1.04	0.33	53
Other Psychiatric Inpatient Utilization per 1,000 population	433,997	-	1.53	42

Adult Employment Status	U.S.	State	U.S. Rate	States
Employed (Percent in Labor Force)*	890,626	54.4%	51.2%	58
Employed (percent with Employment Data)**	890,626	34.6%	27.2%	58

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:**Table 2a**

Age None

Gender None

Race None

Overall The Division of Behavioral Health does not fund inpatient psychiatric hospitals, therefore, this data is based on those served in community programs only.

Table 2b

Age None

Gender None

Race None

Overall The Division of Behavioral Health does not fund inpatient psychiatric hospitals, therefore, this data is based on those served in community programs only.

Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

	Age NA	-	-	-	37,411	11,454	3,577	-	10.46	17

Note:

Admission Rate= number of admissions divided by total served during the year.

U.S. Admissions During Year uses data from states reporting data only. States are only included in "U.S. Total Served" if they also reported data on admissions.

U.S. Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Tables 3 and 6.

State Notes:

Table 3

Age	Data is based on admit age.
Gender	None
Overall	The Division of Behavioral Health does not fund other psychiatric inpatient stays or stays in residential treatment centers for children. See General Notes.

Table 6

Hospitals	The Division of Behavioral Health does not fund services through state hospitals. South Dakota's State Psychiatric Hospital provides the data needed for this table. See General Comments for response to Data Processing Results.
Other Inpatient	The Division of Behavioral Health does not fund other psychiatric inpatient services. Data is not available. Discharges from the State Psychiatric Hospital during the year (duplicated) includes forensic patients.
Residential	The Division of Behavioral Health does not fund residential treatment centers. Data is not available.
Community	None
Overall	See General Notes.

General Notes FY 2022

South Dakota

URS Table Number	General Notes
3, 6	The reduction in the state psychiatric hospital admissions are due to taking two 15 bed units off-line because of staff shortages and also more patients being served near their communities in facilities the psychiatric hospital contracts with in FY21.
6	During approximately 33% of the year in FY20, the State Hospital was dealing with COVID issues. In FY21, they had a full 12 months of dealing with COVID restrictions and staff shortages became critical which caused a decrease in admissions from last year. In FY22, the state psychiatric hospital continued to face staffing shortages while promoting care when available at local community facilities.
7, 7A, 8	Other Federal Funds discrepancy is explained by calling out COVID-19 relief funds separate from Other Federal Funds, especially in the State Hospital row. The total State Hospital expenditure is roughly equal to FY21. COVID relief funding usage also explains the discrepancies for Ambulatory/community non-24 hour care expenditures, along with an increased effort for our state psychiatric hospital to improve community outcomes upon release of clients. The increase in administration expenditures was used for training and education (and utilization of COVID funds). CSC evidence-based practices for First Episode Psychosis expenditures increase is from targeted marketing and awareness outreach efforts which resulted in higher levels of clients served, thus more funds expended to work with clients. Non-direct services drop in expenditures is a result of fully expending TA funds in FY21. Without TA funds in FY22, COVID relief funds were used instead.
7	Medicaid expenditures: From FY20 to FY21, we saw an 11% increase in expenditure of Medicaid funds (about 2.5 million). The increase in Medicaid expenditures from FY21 to FY22 continues this trend, although to a much larger degree. There is no policy changes to explain this difference in expenditures. We have noticed that the providers in the state have been trending away from justice programs for youth which are funded by the division of behavioral health in favor of other mental health programs appropriate for the youth. These mental health programs can be funded by both the division and Medicaid, so that is possibly part of the reason for this trend. This may also be a continuing result of the COVID-19 pandemic, with economic status being impacted by a large portion of families in our communities, thus we may see a larger percentage of our population served that qualify for Medicaid. In fall of 2022, South Dakota passed a Medicaid expansion bill, and so we would expect to see these numbers continue to increase moving forward.
9	The difference between FY21 and FY22 "percent of adults reporting positively about functioning" is two fold. 1) natural variance in the data as there were no targeted efforts/campaigns in this area and 2) utilizing a new data reporting technology to ensure accuracy and better capture all individuals who received services.
12, 17	The Division of Behavioral Health cannot accurately report the number of individuals who have a diagnosis of substance use problem or who have a dual diagnosis of substance use and mental illness at this time. However, the Division continues to work with providers on capturing this data.
14A, 14B	State definition of SMI (ARSD § 67:62:12:01): The client shall be 18 years of age or older and (1) shall meet at least one of the following: (a) The client has undergone psychiatric treatment more intensive than outpatient care and more than once in a lifetime, such as, emergency services, alternative residential living, or inpatient psychiatric hospitalization; (b) The client has experienced a single episode of psychiatric hospitalization with a diagnosis of a major mental disorder; (c) The client has been treated with psychotropic medication for at least one year; or (d) The client has frequent crisis contact with a community mental health center, or another mental health provider, for more than six months as a result of a mental illness; and (2) The client shall meet at least three of the following criteria: (a) The client is unemployed or has markedly limited job skills or poor work history; (b) The client exhibits inappropriate social behavior that results in concern by the community or requests for mental health or legal intervention; (c) The client is unable to obtain public services without assistance; (d) The client requires public financial assistance for out-of-hospital maintenance or has difficulty budgeting public financial assistance or requires ongoing training in budgeting skills or needs a payee; (e) The client lacks social support systems in a natural environment, such as close friends and family, or the client lives alone or is isolated; or (f) The client is unable to perform basic daily living skills without assistance.
14A, 14B	State Definition of SED (ARSD § 67:62:11:01): To be eligible for services the clinical record shall contain documentation that indicates: (1) At least one child in the family under the age 18 meets the criteria of SED as defined in SDCL 27A-15-1.1; or (2) At least one youth 18 through 21 years of age who needs a continuation of services started before the age of 18, in order to realize specific goals or assist in the transition to adult services and meets the criteria of SED defined in SDCL 27A-15-1.1(2)(3)(4) and (5).

URS Table Number	General Notes
16	The difference in total numbers of adults with SMI is two fold: 1) due to increased demand as a result of the COVID-19 pandemic, increased effort was expended to reach non-SMI clients as we saw a need in the community and 2) utilizing a new data reporting technology allowed us to more accurately report this number of clients.
16	New data reporting technology allowed us to report for the first time the number of clients served in FFT.
16	SMI clients served: It appears that in FY21 there was a mistake in reporting adults with SMI. 11,115 was the total number of adults served for us that fiscal year. The correct number of adults served with SMI was 6,250. In FY21, we moved to a different reporting system and it appears that there was an error in the data that was not caught and fixed until after this data was submitted. The new reporting method is more accurate, and we believe there was some level of duplication happening in the FY20 and prior numbers which would help explain why the true FY21 and FY22 numbers are smaller (along with natural fluctuations in data).
16B	<p>South Dakota contracts with 211 helpline to provide these services. 211 is unable to provide unduplicated clients served for this information; they record number of contacts and contact types. Additionally, age information is not recorded for all clients as during a crisis scenario this is not always immediately vital information. We have recorded our most similar data below to provide an example for the type of information that can be reported.</p> <p>621 crisis contacts. 5,416 Listening & Support (resources) contacts. 24,700 referral contacts. 11,432 contacts needed assistance with mental health/substance use disorders. 69,551 total contacts.</p> <p>There was at least 1 contact from each county in South Dakota during the reporting period. 211 provides call, texting, email, and walk in services.</p>
20A, 21	Discrepancy between FY21 and FY22 data is a resulted of increased effort to create stability within the community for clients discharged from state hospital (see comment 8) and natural variance in the data.
20B	Actions that affected the number of admissions from FY20 to FY21 include one adolescent unit off line during Q3 FY20, affecting us more in FY21. FY20 Q3, we took a psych rehab unit off line and there were limitations placed on transfers to Geriatrics because of COVID precautions. Both of these two factors impacted our acute admission units, patients were being held longer in acute until beds on psych rehab would open up and until we could transfer patients to geriatrics while following isolation guidelines upon transfer from acute to geriatrics. The changes implemented during FY21 continue to affect the state psychiatric hospital in FY22.

Errata Sheet to the 2022 URS Output Tables
