

2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

Ohio 2022 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,180,236	43.15	24.37	59
Community Utilization per 1,000 population	7,900,059	43.01	23.53	59
State Hospital Utilization per 1,000 population	108,725	0.30	0.33	53
Other Psychiatric Inpatient Utilization per 1,000 population	433,997	3.47	1.53	42

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

APPROPRIATENESS DOMAIN: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/SU Disorders, FY 2022

Ohio

Reporting Period: 7/1/2021 To: 6/30/2022

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	46.3%	69.7%	74.0%	57
Percent of Children served through the SMHA who meet the Federal definition for SED	73.6%	69.0%	74.0%	57

Co-occurring MH and Substance Use Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and SU disorder	23.6%	26.4%	22.5%	56
Percent of Children served through the SMHA who had a co-occurring MH and SU disorder	3.1%	5.7%	2.5%	56
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance use diagnosis	31.3%	29.8%	24.0%	56
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance use diagnosis	3.2%	10.5%	3.0%	56

Note:

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

Any individual receiving at least one SUD episode of care in addition to MH episode of care are counted (numerator) and divided by the total population of SMI/SED and any treatment total (denominator).

General Notes FY 2022

Ohio

URS Table Number	General Notes
4	<p>Data in Table 4 were drawn from the Ohio Behavioral Health Information System. This is a new data system which is still ongoing adoption among providers. The valid responses collected from providers is improving year by year, which accounts for these increases. However, this data is still representing a very limited proportion (from 0.15% in 2021 to 2.9% in 2022) of our total number of individuals served. The fluctuation in these statistics will likely continue as adoption of the system and data collection increases.</p> <p>The number of valid employments collected for Table 4 was a very limited proportion in the data. About 97% did not have valid employment status responses. The fluctuation in employment, unemployment, not in labor force, would be insignificant.</p> <p>Comparison with numbers with statistics of previous year may reflect changes in overall valid responses collected.</p>
5A	<p>There is an increase in the major category in Table 5A, the Medicaid only group, which accounts for the decreases in the "Non-Medicaid funds only" and "both the Medicaid and Non-Medicaid funds" group. There was an increase in Medicaid enrollment during the pandemic. It is only a small increase in Medicaid only group (around 7%). Along with a reduction in Missing Information group (44%), the actual increase in Medicaid only group may be even smaller.</p>
6	<p>There was an error/reversal in reporting Community Treatment Program in 2021 URS Tables. Data was unavailable for Residential Treatment admission in SFY21 but was available in SFY22. There were no children in facility (< 1) at state hospital in FY22 compared to 1 case with 14 days in FY21.</p>
7	<p>Mental Health Block Grant column includes both Ohio's DMHF20 Award and DMHF21 Award, total will not reflect amount on NoA as both grants were being utilized during the report period. Due to this fact that this is a point in time report that includes expenditures from both Awards, and DMHF21 award expenditures continued until 9/30/22, totals may not reflect actual expenditures of each individual award and set aside minimums and admin may not reflect actual award expenditures.</p>
7	<p>Ohio recently expanded its MOE calculation by including previously unreported Medicaid Managed Care expenditures courtesy of Ohio Dept. of Medicaid. At SAMHSA's guidance as a Medicaid Managed Care State, this total now includes both Federal and State Medicaid expenditures. OhioMHAS is in communication with SAMHSA regarding this change and significant increase in reported expenditures. The Local Fund and Other Local Fund expenditure decreases can be attributed to variance in our FEP/ESMI team survey reporting-likely change in local levy dollars.</p>
7	<p>The addition of COVID (CRRSA) and ARPA funds, as well as increases in regular MHBG awards accounts for the increases in Primary Prevention and Ambulatory Expenditures. The 255% increase in Total Expenditures is accounted by the increased Medicaid expenditure cited above. State admin expenditures are down, likely due to COVID shutdowns and workforce shortages.</p>
8	<p>Increases in regular MHBG award led to an increase in non-direct service programming. Additionally, Medicaid Expansion and Managed Care have caused a small shift in the funding of Non-Direct vs. Direct Service Activities.</p>
14A	<p>This was a fluctuation within a very small group among the population in Table 14A, less than 0.1%. Fluctuation for such a small group would easily create large yearly differences.</p>
15	<p>The number of valid residency information collected for table 15 was a very limited portion in the data, fluctuation in percentage would be magnified for such a small sample size.</p> <p>Data was collected from the Ohio Behavioral Health Information System which is still under ongoing development. The number of valid responses is increasing year by year but still the response rate was very small (from 0.8% in 2021 to 4.8% in 2022). It may not be conclusive until a wider data collection process is achieved and stabilized.</p>
16	<p>This data is provided by Case Western Reserve University's Center for Evidence Based Practices on behalf of Ohio Dept. of Medicaid. The variation from year to year appears to be due to the fact that 7 of the 43 ACT teams did not receive a review last year by their request, which would impact the total number of consumers data was available for.</p>
16	<p>The funding mechanism for these EBP's has always been Medicaid, however the SMHA pays for the fidelity monitoring, trainings, TA, etc. via the Case Western Reserve University Center for Evidence Based Practices. Medicaid now has bundled these programs and tracks them as a bundled service, which makes tracking the distinct services and individuals more difficult for our data contractor.</p>

URS Table Number	General Notes
16B	<p>Sources: Ohio Crisis Services Board Survey Oct. 2021 (latest data available)</p> <p>Crisis Textline 51,818 conversations (45.1% under 18, 54.9% over 18)</p> <p>MRSS served 2,146 families (ENGAGE 2.0 Grant Evaluation data)</p> <p>Availability percentages derived from OhioMHAS Crisis Services Dashboard</p> <p>https://mha.ohio.gov/research-and-data/dashboards-and-maps/dashboards/tableau-resources/crisis-services-dashboard</p>
17	<p>The increase could be due to a SAMHSA grant targeting dual diagnosis youth and young adults with Integrated Co-occurring Treatment. Multiple regions of the state received these funds to identify and serve clients with dual diagnosis.</p>
17	<p>The funding mechanism for these EBP's has always been Medicaid, however the SMHA pays for the fidelity monitoring, trainings, TA, etc. via the Case Western Reserve University Center for Evidence Based Practices. Medicaid now has bundled these programs and tracks them as a bundled service, which makes tracking the distinct services and individuals more difficult for our data contractor.</p>
20B	<p>Fluctuation in percentage would be magnified for when the denominator is small.</p>

Errata Sheet to the 2022 URS Output Tables

This page includes clarifications and corrections to the 2022 URS Output Tables.

ACCESS DOMAIN: Adults with SMI and Children with SED Receiving Crisis Response Services, FY 2022

The table counts and percentages have been updated due to a processing error.

OUTCOMES DOMAIN: Consumer Survey Results, FY 2022

The percentages have been updated in Response Rate for “Children: U.S.” and “Adults: U.S. Average” due to a processing error.
