

2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

New Mexico 2022 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,180,236	101.87	24.37	59
Community Utilization per 1,000 population	7,900,059	101.67	23.53	59
State Hospital Utilization per 1,000 population	108,725	0.17	0.33	53
Other Psychiatric Inpatient Utilization per 1,000 population	433,997	6.65	1.53	42

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Note:

This table uses data from URS Tables 5a and 5b.

Type of Medicaid Data Reported

Data based on Medicaid Paid Services

State Notes:

- 5a Age Race category, "Other Race" includes those where the race was identified as "not available" through our data collection systems.
- 5a Gender Gender categories in our primary data collection system (MMIS) only allows for gender categories of Male, Female, and Unknown. For those with a gender identity, they may select the gender from what's available they identify with.
- 5a Overall As the COVID-19 pandemic has moved to an endemic phase, the number of those served has increased over the past two years due to pandemic restrictions being lifted and expanded availability of telehealth services.
- 5b Overall As the COVID-19 pandemic has moved to an endemic phase, the number of those served has increased over the past two years due to pandemic restrictions being lifted and expanded availability of telehealth services.

Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Note:

Resident clients are clients who were receiving services in inpatient settings at the end of the reporting period.

This table uses data from URS Table 6.

State Notes:

State Psychiatric Hospitals None

Other Psychiatric Inpatient None

Residential Treatment Centers None

Overall As the COVID-19 pandemic has moved to an endemic phase, the number of those served has increased over the past two years due to pandemic restrictions being lifted and expanded availability of telehealth services.

APPROPRIATENESS DOMAIN: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/SU Disorders, FY 2022

New Mexico

Reporting Period: 7/1/2021 To: 6/30/2022

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	75.7%	69.7%	74.0%	57
Percent of Children served through the SMHA who meet the Federal definition for SED	98.1%	69.0%	74.0%	57

Co-occurring MH and Substance Use Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and SU disorder	29.7%	26.4%	22.5%	56
Percent of Children served through the SMHA who had a co-occurring MH and SU disorder	2.4%	5.7%	2.5%	56
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance use diagnosis	26.4%	29.8%	24.0%	56
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance use diagnosis	2.2%	10.5%	3.0%	56

Note:

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

The client counts are determined by identifying a diagnosis of SMI/SED with a co-occurring SUD diagnosis during the review period. The diagnosis is identified through paid claims.

State Notes:

General Notes FY 2022

New Mexico

URS Table Number	General Notes
6	The NM State Hospital had 88 patients served at the beginning of the year with a total of 261 discharges, 50 less than the 2021 report period. The NM BHI has had patients with inpatient stays remain in care longer than the prior report period. Furthermore, the 2020 and 2021 reports periods reflect shorter period in care due to COVID-19 mitigation efforts which resulted in transfers and discharges occurring when applicable to reduce spread in inpatient settings.
6	Similar to average LOS of adults discharged from State Hospital, the NM BHI has had patients with inpatient stays remain in care longer than the prior report period. Furthermore, the 2020 and 2021 reports periods reflect shorter period in care due to COVID-19 mitigation efforts which resulted in transfers and discharges occurring when applicable to reduce spread in inpatient settings.
7	Totals are based on Medicaid capitation and fee-for-service claims during the review period. Capitation is based on the per-member-per-month (PMPM) cost for the month where a behavioral health service was rendered.
7	Medicaid totals were provided by the NM Human Services Department, Medical Assistance Division (MAD) based on methodology of looking at encounters utilizing mental health diagnostic codes and services, provider and claim types to capture the capitation total.
7	The State Hospital totals were provided by the NM Department of Health, Behavioral Health Institute (NM BHI) for the reporting period (FY22).
12	For the 2021, report period, NM reported the percent of adults meeting the Federal definition of SMI at 98%, however this was due to the primary diagnosis which relates the Federal definition of a serious mental illness. During the 2021 report period, NM did see a higher rate of these diagnoses listed as primary condition on our encounter data which impacted the rate upward significantly. During the 2022 report period, these primary diagnoses have decreased significantly bringing the rate of those meeting the Federal definition of SMI to 78.0% which is similar to the 2020 reported rate of 77.4%.
16	Linkages (Permanent Supportive Housing) program's eligibility criteria includes individuals with a SMI diagnosis, homeless/precariously housed, and extremely low income level (at or below 30% Area Median Income), per HUD guidelines.
16	Totals for all EBPs outside of Supported Housing were identified from the Medicaid Management Information System (MMIS) paid claims and encounters. These totals may slightly vary from BCI results.
16B	NM has no utilization of crisis mobile services, crisis stabilization utilization at the moment, and data for the call center went live in the current fiscal year. As there is no information available for the fiscal year in review, this table is left empty.
