

## 2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

## Indiana 2022 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,180,236	21.18	24.37	59
Community Utilization per 1,000 population	7,900,059	21.07	23.53	59
State Hospital Utilization per 1,000 population	108,725	0.17	0.33	53
Other Psychiatric Inpatient Utilization per 1,000 population	433,997	0.10	1.53	42

This table uses data from URS Table 2a, Table 2b, and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

## Note:

This table uses data from URS Table 14a, Table 14b, and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender, as well as Age, Gender, Race and Ethnicity Not Available, are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

**Note:**

Resident clients are clients who were receiving services in inpatient settings at the end of the reporting period.

This table uses data from URS Table 6.

**State Notes:**

State Psychiatric Hospitals LOS for patients discharged decreased this year for both youth and adults. DMHA offered financial incentives to the CMHCs so they could safely transition patients back into the community to make room for a massive influx of ICST referrals.

Other Psychiatric Inpatient None

Residential Treatment Centers None

Overall None

**APPROPRIATENESS DOMAIN: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/SU Disorders, FY 2022**

**Indiana**

**Reporting Period: 7/1/2021 To: 6/30/2022**

<b>Adults and Children who meet the Federal Definition of SMI/SED</b>	<b>State</b>	<b>US Average</b>	<b>US Median</b>	<b>States Reporting</b>
Percent of Adults served through the SMHA who meet the Federal definition for SMI	100.0%	69.7%	74.0%	57
Percent of Children served through the SMHA who meet the Federal definition for SED	100.0%	69.0%	74.0%	57

<b>Co-occurring MH and Substance Use Consumers</b>	<b>State</b>	<b>US Average</b>	<b>US Median</b>	<b>States Reporting</b>
Percent of Adults served through the SMHA who had a co-occurring MH and SU disorder	28.0%	26.4%	22.5%	56
Percent of Children served through the SMHA who had a co-occurring MH and SU disorder	2.0%	5.7%	2.5%	56
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance use diagnosis	28.0%	29.8%	24.0%	56
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance use diagnosis	2.0%	10.5%	3.0%	56

**Note:**

This table uses data from URS Table 12.

**How are the number of clients with co-occurring disorders counted and calculated?**

We collect up to five diagnosis codes. If one of the codes included is a substance-related disorder code, then the person is counted as co-occurring.

**State Notes:**

None

**General Notes FY 2022****Indiana**

<b>URS Table Number</b>	<b>General Notes</b>
6	There was an increase in admissions during the year for both children and adults. LOS for patients discharged decreased this year for both youth and adults. DMHA offered financial incentives to the CMHCs so they could safely transition patients back into the community to make room for a massive influx of ICST referrals.
7	The increase in state funds, EBP for ESMI, state hospitals, admin and totals expenditures is due to the timing of when expenditures posted given the report dates. The Indiana General Assembly did not increase appropriations for these program areas and the increases were not due to CRRSA and ARPA funding.
7A	This increased because of the timing of when expenditures posted given the report dates. DMHA also expanded the number of providers providing first episode psychosis services, from one (Eskenazi) to two (added Porter-Starke CMHC). The increase was not due to CRRSA and ARPA funding.
8	The Total MHBG expenditures for Non-Direct Services decreased because of the timing of when expenditures posted given the report dates.
16	There are 36 less children in therapeutic foster care this year compared to last year.
20a	There was a small decrease in readmissions from last year (10 readmissions). DMHA offered financial incentives to the CMHCs so they could safely transition patients back into the community to make room for a massive influx of ICST referrals.

## **Errata Sheet to the 2022 URS Output Tables**

This page includes clarifications and corrections to the 2022 URS Output Tables.

### **ACCESS DOMAIN: Adults with SMI and Children with SED Receiving Crisis Response Services, FY 2022**

The table counts and percentages have been updated due to a processing error.

### **OUTCOMES DOMAIN: Consumer Survey Results, FY 2022**

The percentages have been updated in Response Rate for “Children: U.S.” and “Adults: U.S. Average” due to a processing error.
