

2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

Montana 2022 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,180,236	72.66	24.37	59
Community Utilization per 1,000 population	7,900,059	72.12	23.53	59
State Hospital Utilization per 1,000 population	108,725	0.80	0.33	53

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Total	79,616	100.0%	7,900,059	100.0%	72.1	23.5	59

Note:

U.S. totals are based on states reporting.

This table uses data from URS Table 3 and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. penetration rates are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

Age 2 females and 3 males in the PRTF 0-17 age group had turned 18 after the midpoint of the reporting period. RTC row excludes 89 adults (36 F + 53 M) treated at the state-operated MT MH Nursing Care Center; however, RTC in MH-CLD includes MMHNCC residents.

Gender None

Overall Numbers include HMK-funded recipients. A smaller percent of youth resided in PRTFs in FY22 primarily due to COVID-19, provider staffing issues and overall fewer out of state providers available.

Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

	Age NA	-	-	-	37,411	11,454	3,577	-	10.46	17

Note:

Admission Rate= number of admissions divided by total served during the year.

U.S. Admissions During Year uses data from states reporting data only. States are only included in "U.S. Total Served" if they also reported data on admissions.

U.S. Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Tables 3 and 6.

State Notes:

Table 3

Age	2 females and 3 males in the PRTF 0-17 age group had turned 18 after the midpoint of the reporting period. RTC row excludes 89 adults (36 F + 53 M) treated at the state-operated MT MH Nursing Care Center; however, RTC in MH-CLD includes MMHNCC residents.
Gender	None
Overall	Numbers include HMK-funded recipients. A smaller percent of youth resided in PRTFs in FY22 primarily due to COVID-19, provider staffing issues and overall fewer out of state providers available.

Table 6

Hospitals	None
Other Inpatient	None
Residential	PRTF includes HMK. All PRTF youth data is included in the 0-17 row. Fewer patients were served at beginning of year due to COVID-19, provider staffing issues, and fewer out-of-state providers available. See General Notes for MMHNCC.
Community	"Served at beginning of Year" based on <90 days between LDOS in FY20 and FDOS in FY21. "Admissions During the year" based on >90 days between two consecutive dates of service. See General Notes.
Overall	None

APPROPRIATENESS DOMAIN: Length of Stays in State Psychiatric Hospitals, Other Psychiatric Inpatient Settings, and Residential Treatment Centers, FY 2022

	Age NA	-	-	-	-	-	-	24	26	-	-	-	-	-

Note:

Resident clients are clients who were receiving services in inpatient settings at the end of the reporting period.

This table uses data from URS Table 6.

State Notes:

State Psychiatric Hospitals None

Other Psychiatric Inpatient None

Residential Treatment Centers Overall PRTF includes HMK. All PRTF youth data is included in the 0-17 row. Fewer patients were served at beginning of year due to COVID-19, provider staffing issues, and fewer out-of-state providers available. See General Notes for MMHNCC.

APPROPRIATENESS DOMAIN: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/SU Disorders, FY 2022

Montana

Reporting Period: 7/1/2021 To: 6/30/2022

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	100.0%	69.7%	74.0%	57
Percent of Children served through the SMHA who meet the Federal definition for SED	100.0%	69.0%	74.0%	57

Co-occurring MH and Substance Use Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and SU disorder	33.0%	26.4%	22.5%	56
Percent of Children served through the SMHA who had a co-occurring MH and SU disorder	6.0%	5.7%	2.5%	56
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance use diagnosis	33.0%	29.8%	24.0%	56
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance use diagnosis	6.0%	10.5%	3.0%	56

Note:

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

Dual diagnosis percents were based on MH clients with a SU diagnosis (excluding nicotine) in paid claims and/or grant-funded data. Please see General Comments for percentages when including nicotine.

State Notes:

Added in FY22 to this table are clients in jail receiving crisis services.

General Notes FY 2022

Montana

URS Table Number	General Notes
3	There were 89 patients served in Montana Mental Health Nursing Care Center (MMHNCC) that were not included in RTC to differentiate from PRTF.
4	The decrease in the number of clients reported on for all employment categories is due to our largest CMHC purchasing a new EHR that resulted in their being unable to extract employment data from it after trying for two months. The URS data reported was provided by smaller mental health centers which resulted in an increase in the percent of clients employed (17% in FY21 vs 25% in FY22). It also resulted in a decrease in the percent not in the workforce (66% in FY21 vs 52% in FY22) and an increase in the percent unemployed but looking for work (15% in FY21 vs. 22% in FY22). However, this data is likely not representative of the employment statistics for all clients served. The state is transitioning to a new data collection system for employment (and other measures) which will reduce the dependence upon CMHCs to collect and report on the data.
4 & 4A	There was less employment data in SFY22 as the state transitions to a new data collection method for employment.
5A	Data from FY21 and FY22 was revised. MH-CLD for both years was resubmitted. Tables 5A & 5B were corrected for both FY21 and FY22.
6	MMHNCC data not included in RTC row: Served at beginning of yr.: 77. Admits during yr.: 12. Discharges during year: 23. LOS for discharged patients: AVG=850 days; MEDIAN: 677. LOS for end-of-yr. residents <1 yr.: AVG=147 days; MEDIAN=127. LOS for end-of-yr. residents >1 yr.: AVG=1,845 days; MEDIAN=1,035 days.
6	The number of Total Admissions to Community Programs during year for FY22 was revised on Table 6.
6	Number Served and Total Admissions to Other Psychiatric Inpatient During the Year were revised to incorporate HMK-funded inpatients to be consistent with FY21 data. FY22 Tables 3, 6, and 15A were revised to reflect those changes.
6	MT Mental Health Nursing Care Center patients were included as RTC in FY21 in Tables 3 and 6, but in FY22 they were addressed in the General Comments. FY21 URS Tables were resubmitted, moving the MMHNCC patients out of Tables 3 and 6 and addressing them in the General Comments for consistency with FY22. HMK-funded PRTF clients were added to FY22's data to be consistent with FY21 data, and the MH-CLD was resubmitted to reflect this change. These changes result in 583 served in PRTFs FY21 and 449 served in FY22. The reduction in total # served and total admissions to RTCs were primarily due to COVID-19, provider staffing issues and fewer out-of-state providers available. The notes on Tables 3 & 6 reflect these reasons. Table 15A data for PRTFs was revised for both FY21 and FY22. Table 6 LOS data was recalculated. MMHNCC patients are still listed in the MH-CLD as being served in a RTC for both FY21 and FY22.
7	The increase in Total EBP for ESMI is due to adding additional staff for the requirement of a coordinated specialty care team.
7	The increase in FEP expenditures is due to adding additional staff for the requirement for a coordinated specialty care team. SFY22 HMK/CHIP/BCBS expenditures of \$9,445,657 were not included in Table 7 or the URS. MT State Hospital cost increased in FY22 due to the need to use traveling nurses as the facility was unsuccessful hiring nurses directly into their vacant positions. Traveling nurses are more expensive.
7A	The increase in FEP expenditures is due to adding additional staff for the requirement of a coordinated specialty care team.
8	The increase in total MHBG expenditures for Non-Direct Service Activities is due to increasing infrastructure support, building EBP workforce development through training and education for future sustainability.
12	Most of the 5% in SUD among adults between FY21 and FY22 can be explained by an increase in the number of co-occurring adults served through the Crisis Mobile Team and County and Tribal Matching Grants. There was also a 1% increase in SUD among youth.
12	Nicotine-related diagnoses were excluded when calculating percent with "Substance Use Problem" in Table 12. When nicotine-related diagnoses are included, the % of those with a co-occurring disorder increases to 46% for Adults and 7% for Youth, which is 0% change for adults and 1% increase for youth compared to FY21. For the BCI, nicotine-related diagnoses were only listed in the BCI if there were no non-Nicotine SUD diagnoses. Qualifying diagnoses excluded SUD dxs in remission.
14A	This increase in Asian consumers with SMI/SED is due to a small n.

URS Table Number	General Notes
14A	<p>Diagnoses included in state SMI definition: F20.0, F20.1, F20.2, F20.3, F20.5, F22, F25.0, F25.1, F31.12, F31.13, F31.2, F31.32, F31.4, F31.5, F31.62, F31.63, F31.64, F31.81, F32.1, F32.2, F32.3, F33.1, F33.2, F33.3, F34.1, F40.01, F41.0, F41.1, F43.11, F43.12, F44.0, F44.1, F44.2, F44.81, F50.01, F50.02, F50.2, F60.3, F64.8, F84.0.</p> <p>Diagnoses included in state SED definition: F20.0, F20.1, F20.2, F20.3, F20.5, F20.81, F20.9, F25.0, F25.1, F25.8, F31.12, F31.13, F31.2, F31.32, F31.4, F31.5, F31.62, F31.63, F31.64, F31.73, F31.75, F31.77, F31.81, F31.89, F32.1, F32.2, F32.3, F32.4, F33.1, F33.2, F33.3, F33.41, F34.0, F34.1, F34.8, F41.0, F41.1, F93.0, F42, F43.10, F43.11, F43.12, F94.1, F94.2, F44.81, F50.01, F50.02, F50.08, F63.81, F64.1, F64.2, F64.8, F84.0, F90.0, F90.1, F90.2, F91.3</p>
15	Changes in percent of living situation were primarily due to having better private residence data.
15	Total number of Consumers Homeless/Shelter revised. The decrease in percent homeless may be due to greater success in housing the homeless.
15A	Montana Mental Health Nursing Care Center (MMHNCC) data not included in RTC row: AGE 21-64: F=6, M=13; AGE 65+: F=30, M=40.
15A	There were fewer youth in PRTFs due to COVID-19.
16	<p>The increase in total number of consumers receiving ACT services was due to an increase in the number of ACT Teams.</p> <p>The increase in number of adults with SMI may be due to improved data collection of diagnoses in our grant-funded programs.</p>
16B	The number of clients receiving mobile crisis services in Table 16B excludes 449 Adults and 40 Youth who were not SMI/SED. There were also 440 additional encounters in which the identifying data gathered was insufficient to include in distinct count cells B12 and D12.
16B	Due to our rural frontier status, not all Mobile Crisis Teams can logistically operate at 24/7 capacity.
16B	Call Center data is not sufficiently detailed to unduplicate; instead, the data provided is number of calls.
17	The number of consumers receiving Illness Self-Management services was recalculated. Table 17 was revised.
20	The increase in both 30-day and 180-day readmission rates for Forensic state hospital patients might be explained by: 1) a small n, and 2) by a shorter average LOS (423 days for Forensic commitments in FY21 vs. 375 days for Forensic commitments in FY22), as well as shorter LOS in FY22 for Civil commitments.
20A	The 3.6 % increase in the 30-day readmission rate compared to FY21 may be explained by the 12-day decrease in average LOS (from 77 days for Civil commitments in FY21 to 65 Civil commitments in FY22).
20A	The average LOS was 59 days for those readmitted within 30 days; 87 days for those readmitted within 180 days; and 106 days for those not readmitted in the FY.
20B	The increase in percent of Forensic Commitments to the State Hospital is due to a small n.
21	The increase in 180-day readmission rates for Forensic state hospital patients compared to FY21 might be explained by a shorter average LOS (22 days for those not readmitted vs. 11 days for those readmitted within 180 days).

Errata Sheet to the 2022 URS Output Tables

This page includes clarifications and corrections to the 2022 URS Output Tables.

ACCESS DOMAIN: Adults with SMI and Children with SED Receiving Crisis Response Services, FY 2022

The table counts and percentages have been updated due to a processing error.

OUTCOMES DOMAIN: Consumer Survey Results, FY 2022

The percentages have been updated in Response Rate for “Children: U.S.” and “Adults: U.S. Average” due to a processing error.
