

2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

Louisiana 2022 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,180,236	9.45	24.37	59

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:**Table 2a**

Age None
 Gender Person (Transgender) is reported as "Other" category in gender.
 Race None
 Overall Unless indicated otherwise, the only clients reported are those served by SAMHSA MHBG funds.

Table 2b

Age None
 Gender Person (Transgender) is reported as "Other" category in gender.
 Race None
 Overall None

Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 14a

URS Table Number	General Notes
2A, 2B, 3, 4, 5A, 5B, 1A, 14B, 15A	Person (Transgender) is reported as "Other" category in gender.
2A	Unless indicated otherwise, the only clients reported are those served by SAMHSA MHBG funds.
4	Employed status only applied to consumers who are 18 or above at Community Mental Health Programs. Total consumers who were 18 or above at Community Mental Health Programs in FY2022 was 35,181. Total consumers who were 18 or above at Community Mental Health Programs in FY2021 was 33,436. This increase in number of total adult consumers at Community Mental Health Programs partially contributed to increase in total number of consumers employed.
5A	Medicaid Expansion started in Louisiana in July 2016. Total number of consumers in FY2022 is 43,717. Total consumers in FY2021 was 41,251. This increase in number of consumers partially contributed to increase in total number of consumers with Medicaid Funding only.
6	The most likely underlying factor for longer Length of Stay (LOS) at a State Psychiatric Hospital is the time of admission. Since ALOS (Average Length of Stay) is calculated by subtracting the date of admission from the end of reporting period, i.e. the fiscal year (06/30/YYYY), clients admitted during the first half of the fiscal year will have a longer ALOS if they are not discharged.
10	The amount located in the "Set-aside for FEP Programs" column may also apply to the "Set-aside for ESMI Programs" column.
12	<p>We did further analysis on numerator (A) and denominator (B) that were used to calculate the percentage, listed in URS Table 12. Please see the numbers and percentages listed below for FY2018 – FY2022.</p> <p>To understand an increase or decrease in percentages, we need to look at both numerator and denominator.</p> <ul style="list-style-type: none"> • Numerator (A): In FY 2022, MHBG funded providers under LA SMHA, reported of serving 113 less (715 in FY 2021 – 602 in FY 2022) children who also had a diagnosis of substance abuse. <ul style="list-style-type: none"> o In other words, there were 113 fewer children in FY2022, who reported with drug and alcohol-related problems. LA SMHA served all of them. o FY2022 had a smaller Numerator, compared to FY2021. • Denominator (B): In FY 2022, MHBG funded providers under LA SMHA, reported of serving 727 more (7,569 in FY 2022 – 6,842 in FY 2021) children by the SMHA. <ul style="list-style-type: none"> o FY 2022 had a larger Denominator, compared to FY2021. <p>Calculated Percent of children served by the SMHA who also have a diagnosis of substance abuse (C), were less in FY2022 compared to FY2021, due to smaller cohort in the numerator (A) and a larger cohort in the denominator (B).</p> <p>Looking only at the decrease in percentage of children served by the SMHA (who also have a diagnosis of substance abuse), can be misleading. This is because, the individual indicators used in this calculation may both show improvement (more number of children served by the SMHA, AND, less number of children reporting with drug and alcohol-related problems and getting served by the SMHA), but when we divide one improved count with another improved count, the percentage gets smaller.</p>
16	A survey was conducted in order to collect fidelity monitoring information from the LGEs. The narrative responses reflect responses from the LGEs who implement these EBPs. The yes/no answers for use of SAMHSA toolkit & training reflect majority of the LGE responses. The pre-identified programs in the table do not reflect the entire service array of LGEs.
16B	Louisiana Medicaid just started the Call Center Program in March 2022. Medicaid Crisis Mobile Services for adults began in certain areas of the state in March of 2022.
17	A survey was conducted in order to collect fidelity monitoring information from the LGEs. The narrative responses reflect responses from the LGEs who implement these EBPs. The yes/ no answers for use of SAMHSA toolkit & training reflect majority of the LGE responses. The pre-identified programs in the table do not reflect the entire service array of LGEs.
