

## 2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

## Vermont 2022 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,180,236	40.71	24.37	59
Community Utilization per 1,000 population	7,900,059	40.59	23.53	59
State Hospital Utilization per 1,000 population	108,725	0.12	0.33	53
Other Psychiatric Inpatient Utilization per 1,000 population	433,997	0.78	1.53	42

Adult Employment Status	U.S.	State	U.S. Rate	States
Employed (Percent in Labor Force)*	890,626	25.5%	51.2%	58
Employed (percent with Employment Data)**	890,626	19.5%	27.2%	58

Adult Consumer Survey Measures	State	U.S. Rate	States
Positive About Outcome	70.5%	77.7%	52

Child/Family Consumer Survey Measures	State	U.S. Rate	States
Positive About Outcome	66.8%	70.7%	47

Readmission Rates:(Civil "non-Forensic" clients)	U.S.	State	U.S. Rate	States
State Hospital Readmissions: 30 Days	5,477	2.5%	7.8%	44
State Hospital Readmissions: 180 Days	13,252	8.8%	18.9%	48
State Hospital Readmissions: 30 Days: Adults	5,064	2.5%	8.0%	42
State Hospital Readmissions: 180 Days: Adults	12,250	8.8%	19.3%	46
State Hospital Readmissions: 30 Days: Children	413	0.0%	6.5%	21
State Hospital Readmissions: 180 Days: Children	1,002	0.0%	15.7%	22

Living Situation	U.S.	State	U.S. Rate	States
Private Residence	4,235,783	88.0%	85.8%	58
Homeless/Shelter	199,656	3.4%	4.0%	53
Jail/Correctional Facility	69,379	0.1%	1.4%	52

**Note:**

**Are Client Counts Unduplicated?** Duplicated between Hospitals and Community **Number of States with Unduplicated Counts** 43

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

**State Notes:**

<b>Table 2a</b>	
Age	None
Gender	None
Race	In Vermont, a single race code is used for Asian/Native Hawaiian/Pacific Islander. Typically, these clients are of Asian origin.
Overall	Counts are based on a client file that includes all CMH clients and State Hospital clients for FY2022. A small number of individuals may be counted more than once due to movement among community programs or movement between hospitals and community.
<b>Table 2b</b>	
Age	None
Gender	None
Race	In Vermont, a single race code is used for Asian/Native Hawaiian/Pacific Islander. Typically these clients are of Asian origin.
Overall	Counts are based on a client file that includes all CMH clients and State Hospital clients for FY2022. A small number of individuals may be counted more than once due to movement among community programs or movement between hospitals and community.

## Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

## State Notes:

### Table 14a

Age	None
Gender	None
Race	In Vermont, a single race code is used for Asian/Native Hawaiian/Pacific Islander. Typically, these clients are of Asian origin.
Overall	Counts are based on a client file that includes all CMH clients and State Hospital clients for FY2022. A small number of individuals may be counted more than once due to movement among community programs or movement between hospitals and community.

### Table 14b

Age	None
Gender	None
Race	In Vermont, a single race code is used for Asian/Native Hawaiian/Pacific Islander. Typically, these clients are of Asian origin.
Overall	Counts are based on a client file that includes all CMH clients and State Hospital clients for FY2022. A small number of individuals may be counted more than once due to movement among community programs or movement between hospitals and community.

# ACCESS DOMAIN: Adults with SMI and Children with SED Served in Community Mental Health Programs by Age and Gender, FY 2022

	Age NA	157	32	190	37,411	11,454	3,577	0.83	10.46	17

**Note:**

Admission Rate= number of admissions divided by total served during the year.

U.S. Admissions During Year uses data from states reporting data only. States are only included in "U.S. Total Served" if they also reported data on admissions.

U.S. Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Tables 3 and 6.

**State Notes:**

**Table 3**

Age	None
Gender	Patients who identified as transgender were placed in the gender not available cell. We will try to adjust our data collection to utilize the other column for FY23.
Overall	Data for Institutions under the Justice System were not available for FY2022 but we will continue to try to obtain this data.

**Table 6**

Hospitals	None
Other Inpatient	Other Psychiatric Inpatient includes individuals receiving involuntary treatment in designated community hospital psychiatric units.
Residential	Residential Treatment includes children receiving Medicaid funded PNMI (Private Non-Medical Institution) residential services.
Community	None
Overall	None

## Vermont

URS Table Number	General Notes
All with Gender	We will work to be able to change our data reporting to be able to utilize the 'other' category.
3	Counts are based on a client file that includes all CMH clients, State Hospital clients, and involuntary inpatient clients for FY2021. A small number of individuals may be counted more than once due to movement among community programs or movement between hospitals and community.
4	The number of clients employed continues to show a downward trend. This may be impacted by Covid concerns.
4	The number of unknown values for employment increased over the past two years due to this data being removed as a requirement from submissions from our local community mental health agencies.
6	<p>The state hospital was able to open more beds for inpatients during FY22 than were open in FY21 so this affected the total number of consumers served at the beginning of the year.</p> <p>The increase in total number of consumers served in community programs at the beginning of the year is most likely due to clients coming back for services as COVID concerns wane.</p> <p>The increase in total number of consumers served in other psychiatric inpatient settings at the beginning of the year is likely due to the opening of more beds in these facilities.</p> <p>The decrease in total number of consumers served in residential treatment centers at the beginning of the year shows normal fluctuations that we have seen over the years. This number was 33 in FY20 and 46 in FY19. This same normal fluctuation affects the total admissions to residential treatment centers during the year.</p>
7	<p>Total MHBG Expenditures – Increase is attributed to the increase in MHBG funding awarded.</p> <p>Total Other Funds Expenditures – Decrease is due to a decrease in COVID grant expenditures.</p> <p>Total State Funds Expenditures – Increase is due to a phase out of federal investment funding in the PNMI program.</p> <p>Total Other Expenditures – Decrease is due to a decrease in Per Diem revenues.</p> <p>Total Primary Prevention Expenditures – New grants were awarded for Primary Prevention.</p> <p>Total EBP for ESMI Expenditures – New grants were awarded for ESMI/EBP.</p> <p>Total State Hospital Expenditures – Increase in Contractors needed for staffing.</p> <p>Total Other 24-Hour Care Expenditures – Increase in Contractors needed for staffing.</p> <p>Total Administration Expenditures – Expenses for Adult and Children's services administration included in 2022.</p>
7	Total Administration Expenditures – Salary and Fringe expenditures for DMH employees that manage the Adult and Children's services were included in Administration in 2022. This is a change from 2021 where this expenditure was included in Ambulatory/Community Non 24 Hour Care.
8	Total MHBG Expenditures for Non-Direct Service Activities – Includes new grants for COVID-19.
12	Co-occurring disorders include clients who have a DSM substance use diagnosis (ICD-10) and a DSM mental health diagnosis who also meet the Federal definition of SMI. The Vermont diagnosis of SED is based on several ICD10 diagnoses. SED determination based on diagnosis categories in ICD10: F20-F29: Schizophrenia and Other Psychosis, F30-F39: Mood Disorders, F40-F49: Anxiety Disorders, F50-F51: Eating Disorders, Sleep Disorders, F90-F98: Child Disorders, F99: Unspecified.
12	We are not sure why there is a decrease from 17% SMI to 14% SMI for FY21 to FY22. This decrease could be affected by a larger number of clients in our community programs that do not have high intensive needs - those clients may have been the ones that stayed away during high transmission of COVID periods and then started to return in FY22. This is just a hypothesis on our part.
14A	The Vermont diagnosis of SED is based on several ICD10 diagnoses. SED determination based on diagnosis categories in ICD10: F20-F29: Schizophrenia and Other Psychosis, F30-F39: Mood Disorders, F40-F49: Anxiety Disorders, F50-F51: Eating Disorders, Sleep Disorders, F90-F98: Child Disorders, F99: Unspecified.
15	The number of consumers in Jail/Correctional Facilities increased from 15 to 18. This may be due to our court systems becoming more operational in FY22, thus able to process more clients, resulting in larger numbers being in Jail. Again, this is a hypothesis on our part.
16B	For FY2022, we are unable to provide data for the Call Center section of this table. We will work on this for next year. Additionally, we are not sure how to calculate the data entries for the Estimated Percentage of the Population with Access to the Service sections.
20A	In FY22, there were 2 readmits out of 80 discharges during the year - 2.50%. In FY21, there were 2 readmits out of 85 discharges during the year - 2.35%. When not rounded to whole percentage values, the numbers are much closer, only 0.15% different.
20B	In FY22, there was 1 readmit within 180 days out of 15 discharges during the year - 6.67%. In FY21, there were 0 readmits within 180 days, out of 15 discharges during the year. This is only 1 person, not a large amount. The percentage value for FY22 is large due to the small number of discharges in the denominator.

## **Errata Sheet to the 2022 URS Output Tables**

This page includes clarifications and corrections to the 2022 URS Output Tables.

### **ACCESS DOMAIN: Adults with SMI and Children with SED Receiving Crisis Response Services, FY 2022**

The table counts and percentages have been updated due to a processing error.

### **OUTCOMES DOMAIN: Consumer Survey Results, FY 2022**

The percentages have been updated in Response Rate for “Children: U.S.” and “Adults: U.S. Average” due to a processing error.
